

Datasheet

Plastic card bracket for KM6-II subrack

RS Stock number 0500847

Features

The normal PCB mounting brackets are for use where front panels are mounted into IEC/DIN subracks and caseframes and require the conventional 2,54 gap between the rear of the front panel and the PCB.

Available in two versions moulded in Noryl or diecast.

The die cast version is now tapped in both axes, making assembly easier and quicker
