

STEEL  
GALVANIZED

# NON-COMBUSTIBLE BIN

C/w Handles & Lid

## Description

Manufactured according to stringent production standards. Easy maintenance with smooth inner & outer surfaces. Fully galvanized steel body and lid makes this bin literally non-combustible. Evergreen product in USA and European countries. 100% recyclable. Environment friendly.

Keeping the lid close can prevent pests such as flies, birds, cats & rodents from accessing the food waste. Thus, stop spreading of diseases by keeping germs & bacteria at bay.

Ideal & safe for storing sharp breakable wastes like glass bottles and jars. Making it safe to handle, transport and discard. Most preferred choice for cabins, as it is made from non-combustible material.

## Advantages

- Heavy gauge galvanized steel is strong and durable
- Fold down handles for convenient carrying
- Offset bottom keeps bin off the ground
- Deep body & Lid corrugation for superior strength and durability
- Weather-resistant design
- Anti-static
- Non-combustible
- For dry storage only
