- Anti-abrasive

## RS PRO Bag of 100 White Cloths for General Cleaning, Polishing Use

RS Stock No.: 251-3744

RS Professionally Approved Products bring to you professional quality parts across all product categories. Our product range has been tested by engineers and provides a comparable quality to the leading brands without paying a premium price.

## Product Description

These microfibre cloths are spun-laced and non-woven ensuring they are completely lint free so you will not leave fibres behind after cleaning.

Their high absorbency, high tear and wet strength makes these perfect for cleaning or polishing.

The tiny fibres can absorb large amounts of liquids, many times its weight so they also perfect for cleaning up spills. The large surface area of these fibres enables them to pick up and hold on to dust and dirt.

Microfibre cloths can be used on their own, with water or with a solvent for more intensive cleaning. The fibres are soft enough to be able to use on plastic and glass without scratching.

RS PRO have a great range of multi purpose wipes at low prices suitable for various applications to meet all your cleaning requirements.

## General Specifications
