

Datasheet

Stock No. 2217861

500mm PE Traffic Cone

**Feature:**

Polyethylene Traffic Cones to 'engineers standard'.

These cones are known to be used for events, in private car parks and to help designate specific spaces and warn of hazardous areas.

Not for use on public highway.

- Vibrant colour with reflective tape
- Sturdy and durable
- Useful handle knob on top for easy carrying

| Physical Properties  | Unit                    | Value                     |
|----------------------|-------------------------|---------------------------|
| Colour               |                         | Orange and White          |
| Material             | -                       | High Density Polyethylene |
| Weight               | kg                      | 2.3                       |
| Height               | mm                      | 500                       |
| Base Diameter        | mm                      | 295                       |
| Tensile Strength     | MPa                     | 18                        |
| Hardness             | ShD                     | 50                        |
| Abrasion Performance | mm <sup>3</sup> /1.61km | 210                       |
| Elongation at break  | %                       | 400                       |
| Impact elasticity    | %                       | 25                        |
| Maximum Temperature  | °C                      | 60                        |
| Minimum Temperature  | °C                      | -25                       |
