

Data Sheet

DIN rail mount SINGLE PHASE SUPPRESSOR

RS Stock No: 240393

These resistor capacitor suppressors are designed to reduce contact arcing where inductive loads are involved, thereby increasing the life of their contacts.

They may also be used for reducing dv/dt across thyristors or other solid state devices.

Specification	
Capacitance	100 nF ± 10 %
Resistance	100 Ohm ± 5% 3.5 Watt
Operating Voltage	500 V RMS (Max)
Supply Frequency	50 / 60 Hz
Operating Temperature	-40°C to +70°C
Insulation Resistance	100 MΩ 500 V
Approvals	BS, EN, ISO 9001-2008

Din Rail Mounting:

Top Hat (EN50022, DIN46277-3 BS5584)

G. Profile (EN50035, DIN46277-1 BS5825)
