

## FEATURES

- Universal 85 - 305Vac and 120 - 430Vdc
- Operating temperature range - 30°C to +70°C
- Up to 90.5% efficiency
- No-load power consumption < 0.5W
- Over-voltage class III
- Output short circuit, over-current, over-voltage protection
- EMI performance meets. CISPR32 / EN55032 CLASS B
- Safety IEC/EN/UL62368, EN60335, EN61558, GB4943
- Operating Altitude upto 5000m
- Supplied with Terminal cover

## RS PRO Embedded Switch Mode Power Supplies

RS Stock No.: 254-3524

RS Professionally Approved Products bring to you professional quality parts across all product categories. Our product range has been tested by engineers and provides a comparable quality to the leading brands without paying a premium price.

## Product Description

AC-DC switching power supply. It features universal AC input and at the same time accepts DC input voltage, cost-effective, low no load power consumption, high efficiency and high reliability. These converters offer excellent EMC performance and meet IEC/EN61000-4, CISPR32/EN55032, IEC/UL/EN62368, GB4943 standards and they are widely used in areas of industrial, LED, street light control, electricity, security, telecommunications, smart home etc.

<b>Model</b>	AC-DC Enclosed 75W
<b>Mounting Type</b>	Chassis Mount
<b>MTBF</b>	MIL-HDBK-217F@25°C > 300,000 h
<b>Applications</b>	Industrial control systems, instrumentation and lighting

## Product Characteric Curve

Note: 1. With an AC input voltage between 85 -100VAC and a DC input between 120-140VDC the output power must be derated as per the temperature derating curves;

Note:

1. Unless otherwise specified, parameters in this datasheet were measured under the conditions of  $T_a=25^\circ\text{C}$ , humidity  $<75\%RH$  with nominal input voltage and rated output load.
2. The ambient temperature derating of  $5^\circ\text{C}/1000\text{m}$  is needed for operating altitude greater than 2000m.
3. In order to improve the efficiency at high input voltage, there will be audible noise generated, but it does not affect product performance and reliability.
4. Products are related to laws and regulations: see "Features" and "EMC".
5. The outer case needs to be connected to the earth of system when the terminal equipment in operating.
6. Our products shall be classified according to ISO14001 and related environmental laws and regulations and shall be handled by qualified units.
7. The power supply is considered a component which will be installed into a terminal equipment. All EMC tests should be confirmed with the final equipment.
