Thermocouple Sensor Monitoring Wall Port

RS Stock 788-7129

Specifications

Description

The TC Wall Port is a wall-mounted thermocouple temperature sensor monitoring point. It provides an easy to use connection point between a thermometer and a thermocouple probe.

To use install a thermocouple sensor on the testing point and plug into the TCWALLPORT. Whenever you require a measurement of the test point you can simply then plug your thermometer into the TCWALLPORT.

There is a label area on the TCWALLPORT for the application of a barcode label to allow for use with the MM7000 thermometer for automatic recording of temperature points.

Features

- **ROBUST AND SPLASH-PROOF Plastic (ABS) CONSTRUCTION**
- **EASY INSTALLATION**
Can be wall mounted using screws or adhesive tape
- **COMPACT AND UNOBTRUSIVE**
Measures just 52 x 52mm
- **COMPATIBLE WITH BOTH K AND T TYPE SENSORS**
