

CARPET SHAMPOO

DESCRIPTION

Carpet Shampoo is a concentrated dry-foam type of shampoo used for both dry foam shampooer and rotary shampooer. It has deep cleaning action through rich lather of the solution that releases trapped soils from piles of the carpet and absorb them by picking up into foams.

The unique formulation of **Carpet Shampoo** prevents the carpet from fast re-soiling and thus retains the fine look of the carpet for a long time.

SPECIAL FEATURES

Soil resistant type of foam cleaner used for dry foam or rotary shampoo cleaning.

Highly concentrated.

Easy to apply dry vacuum cleaning without damaging carpets.

APPLICATION AND USAGE

Normal dilution ratio

For dry foam shampooer : 1:20

For rotary shampooer : 1:15

Standard coverage

For dry foam shampooer :

4000-8000 m² / 20L

For rotary shampooer :

300-600 m² / 20L

1. Before using **Carpet Shampoo**, apply the dry vacuum to remove surface litter and dust. Make a preliminary test applying a small amount of the cleaner onto an inconspicuous part of the carpet to avoid de-coloration which may be caused by the cleaning action.

2. Dilute the solution of **Carpet Shampoo** with water or warm water at the proper ration depending on the cleaning machine which you will use, and fill in the solution tank.

3. After cleaning with appropriate shampooing machines, allow for drying time of between 30 minutes to 16 hours depending on the type of machine used and the type of carpets.

4. After the carpet got completely dried, apply dry vacuum to pick up the dried minute dust and give brushing to comb the lie of carpet piles.
