

FEATURES

- Required to join/connect tubing together
- A high-grade polymer with steel core, offering strength and rigidity
- Will fit any square tube with internal dimensions of 25mm

RS PRO Square Tube 2-Way Connector, strut profile 25mm,

RS Stock No.: 621-691

RS Professionally Approved Products bring to you professional quality parts across all product categories. Our product range has been tested by engineers and provides a comparable quality to the leading brands without paying a premium price.

Product Description

RS PRO offers this great tube connector that fits 25 mm strut profile. It provides structural strength to the joints and connections. No screws are required as these are simply pushed together into the correct square tubing. These are great if you need to extend your structure or if you need to add some strength to corners. Constructed from a steel core and a black plastic coating ensures strength, with a soft to touch feel.
