Safety Ergo Blowgun with Extended Nozzle

Designed in the UK, this Ergo Safety Blowgun features a safety valve which ensures the air inlet will automatically be reduced to the recommended 2 bar. This virtually eliminates user error and ensures safety.

This Ergo Blowgun has been designed for easy storage with multiple hanging options. The ergonomically designed handle with textured grip offers comfort in use, while the easy to operate trigger allows precision control.

- Safety valve - 2 Bar regulated to eliminate user error and ensure safety
- 9" extension nozzle can be further cut and bent to suit users application
- Robust nylon filled material
- Traditional hanging ring with hanging also available between trigger and handle

SPECIFICATIONS

Inlet Size	1/4" BSPT
Maximum Pressure	10 Bar
Inlet	2 Bar regulated
Air Flow	11 cfm @ 100 psi
Noise Level	90 dBa
Conformity	EU/2003/10/CE
Nozzle Style	9" Extended Nozzle
