

Features

- Prevents spinning during installation in timber
- Good corrosion resistance
- Able to handle low and high temperatures
- Use for fixing wooden panels to masonry or each other
- Use for low load bearing applications

RS PRO Coach Bolts

RS Stock No.: 122-4425

RS PRO Professionally Approved Products bring to you professional quality parts across all product categories. Our product range has been tested by engineers and provides a comparable quality to the leading brands without paying a premium price.

Product Description

RS PRO coach bolt made of A2 stainless steel is plain finished for an improved toughness and hardness. This coach bolt has a domed head with a square section underneath that pulls into the material or square hole. The bolt is self locking when you place them through a square hole and prevents spinning during installation in timber. It offers good corrosion resistance and is able to work under both low and high temperatures. This M8 threaded coach bolt measures 25 mm long and is suitable for fixing wooden panels and for load bearing applications.
