

Energy Absorber Rope Lanyard

Technical Specifications

Products Description

Connecting Elements: A twist lock steel Karabiner and a scaffolding steel hook.

Lanyard Type: Energy Absorbing Twist Rope Lanyard with a green and black tracer strand (age indicator) designed to optimize strength, durability, and flexibility.

Rope End: Sewn with thimbles and splines protected by a transparent sleeve.

Application & Function

- Energy Absorbing Rope Lanyards provide a vital connection between your harness and anchor point.
- Should a fall occur, the energy absorber tear webbing activated, elongates and decelerates the user smoothly, reducing fall impact forces to less than 6KN.

Specification

Rope Material: Polyamide Twisted Rope.

Karabiner Material: Forged Steel with 22mm gate opening.

Hook Material: Forged Steel with 50mm gate opening.

Total Length: 1.5 meters.

Rope Colour: White with Green & Black Tracer.

Compliance: CE EN355, CE EN362, CE EN354, SS528:2006

Packaging: 10 pcs/Carton, Individual pack in 1 piece per Box.
