Steel RS PRO M5 Cage Nut

RS Stock No.: 523-115

RS Professionally Approved Products bring to you professional quality parts across all product categories. Our product range has been tested by engineers and provides a comparable quality to the leading brands without paying a premium price.

Cage Nut

Product Description

These RS PRO cage nuts are steel square nuts with a spring steel surround which wraps around the nut like a cage. The cage has two wings that when compressed or pinched together it can then be inserted into a square hole. The wings are then released to hold the cage nut in place. They are quick and easy to install and are ideal for mounting front panels to slide systems and instrument housings.

This range includes the following types:
