Variable speed drives and soft starters

Improve your energy efficiency and sustainability with Altivar variable speed drives and soft starters. Manage motor control applications up to 20 MW with products ranging from compact products to custom-engineered solutions. Our connected devices offer built-in intelligence to improve operational efficiency, availability, and functional safety in various application areas, such as industrial processes, machines, or buildings.

Water & wastewater

Oil & gas

Circulating pumps for building management

Introduction to the offer: applications

The Easy Altivar 610 drive is an IP20 frequency inverter for three-phase asynchronous motors and synchronous motors (up to 160 kW/216 HP), specially designed for standard applications in the following market segments and domains:

Market segments

Water & wastewater

Oil & gas

Domains

Process & machine management

Building management

Typical applications in the market segments

Water & wastewater

- Intake pump
- Booster pump
- Lifting pump
- Aeration blower

Oil & gas

- Circulating pump
- Drain pump
- Oil transfer pump

Pump and fan applications in the domains

Process & machine management

- Air cooling system fan
- Circulating pump
- Cooling fan
- Draft fan
- Compressor
- Conveyor

Building management

- Fan
- Circulating pump

ATV610D55N4...D90N4

ATV610C11N4...C16N4

Presentation of the offer

The Easy Altivar 610 offer covers motor power ratings from 0.75 to 250 kW/1 to 400 HP for three-phase voltages between 380 and 460 V.

Easy Altivar 610 drives can help improve equipment performance and reduce operating costs by optimizing energy consumption and user comfort.

A communication module is available for seamless integration into the main automation architectures.

Easy Altivar 610 drives feature various configurable I/O as standard to facilitate adaptation to specific applications.

They offer a plug & play solution whereby parameters are preset in the factory to the desired configuration to help save process control and operating time.

Rugged

Easy Altivar 610 drives are robust products designed to adapt to various levels of thermal stress and to harsh environments.

- Operating temperature (for continuous monitoring):
 - Mounting in enclosure; mounted singly or side-by-side:
 - For ATV610U07N4...C16N4 and N4Z products: -15...+60 °C/+5...+140 °F, 45...60 °C/113...140 °F with derating
 - For size 7 products ATV610C22N4...C25N4: -10...+60 °C/+14...+140 °F, 40...60 °C/104...140 °F with derating
 - Storage and transport temperature: -40...+70 °C /-104...+158 °F
 - Operating altitude:
 - 0...1,000 m/0...3,281 ft without derating
 - 1,000...4,800m/3,281 ft...15,748 ft with derating of 1% per 100 m/328 ft
 - Chemical class 3C3 conforming to IEC/EN 60721
 - Dust pollution resistance class 3S3 conforming to IEC/EN 60721
 - ATV610C22N4...C25N4 drives are certified as chemical class 3C2 and mechanical class 3S2 conforming to IEC/EN 60721
 - Electronic cards with protective coating
 - Protection to suit requirements:
 - IP20 for mounting in enclosure
 - IP40 on the top of the product (with top cover)
 - IP43 for remote display terminal

Electromagnetic compatibility (EMC)

Compliance with electromagnetic compatibility requirements has been incorporated into the design of the drive, which simplifies installation and provides an economical means of helping to ensure equipment meets CE marking requirements.

Easy Altivar 610 drives have a category C3 EMC filter (see page 4).

Installation and maintenance

Easy Altivar 610 drives are ergonomically designed to adapt to any type of installation:

- Products, systems, or integrated in IMCC
- IP20
- Easy installation of products and systems:
 - Cable entry equipped with Romex cable glands to maintain an EMC connection for the power and control cable
 - Color code for connections to the display terminal and control terminals
- Asynchronous motors and synchronous motors (up to 160 kW/216 HP) drive in open loop for 0.1...500 Hz output frequency
- Lower maintenance costs:
 - Fans can be replaced in less than 5 minutes
 - No maintenance tool required
 - Limited number of parts

Green product

Easy Altivar 610 drives have been designed to have a smaller carbon footprint: the Green Premium product label, Schneider Electric's eco-mark, indicates compliance with international environmental standards such as:

- RoHS according to European Directive 2011/65 and the Commission Delegated Directive (EU) 2015/863
- REACH according to EU regulation 1907/2006
- IEC 62635: The end-of-life instructions comply with the latest recycling rules, 85% of the product components can be recycled.

Variable speed drives

Easy Altivar 610

Operating modes and integrated functions

Normal duty and Heavy duty modes

Normal duty and Heavy duty operating modes

The Easy Altivar 610 offer covers motor power ratings from 0.75...250 kW/1...400 HP for three-phase voltages between 380 and 460 V.

Three-phase power supply	Motor power	Degree of protection	Reference
380...460 V	0.75 kW...250 kW 1...400 HP	IP20	ATV610U07N4...C25N4

Easy Altivar 610 variable speed drives are designed for use in two operating modes that can optimize the drive nominal rating according to the system constraints.

These two modes are:

- Normal duty (ND): Dedicated mode for applications requiring a slight overload (up to 110% for 60 s or 120% for 20 s) with a motor power no higher than the drive nominal power
- Heavy duty (HD): Dedicated mode for applications requiring a significant overload (up to 150% for 60 s) with a motor power no higher than the drive nominal power derated by one rating

These two operating modes make the Easy Altivar 610 range suitable for use in variable and constant torque applications, such as pump, fan, compressor, and conveyor.

Integrated functions

Integrated DC chokes

Above 4 kW/5 HP, Easy Altivar 610 variable speed drives are supplied with an integrated DC choke to reduce harmonic distortion.

Integrated EMC filters

Easy Altivar 610 drives have integrated radio interference input filters in accordance with the EMC standard for variable speed electrical power drive "products" IEC/EN 61800-3, edition 2, category C3 in environment 1 or 2, and to comply with the European EMC (electromagnetic compatibility) directive.

Maximum length of shielded cable (1) according to IEC/EN 61800-3, category C3: 50 m/164 ft (for all ratings).

The integrated EMC filter creates leakage current to ground. It is possible to reduce the leakage current by removing the filter capacitors (see the diagrams on our website or refer to the [Installation Manual](#)). In this configuration, the product does not meet the EMC requirements according to standard IEC 61800-3.

Communication protocol

The Modbus serial link allows the connection of configuration and runtime tools via two integrated ports.

(1) Values given depend on the nominal switching frequency of the drive. This frequency depends on the drive rating. If motors are connected in parallel, it is the total length of all cables that should be taken into account.

Easy Altivar 610 drive with integrated EMC filter

Configuration and runtime tools

Easy Altivar 610 drives can be supplied with a plain text display terminal (see [page 10](#)), offering the following functions:

- Drive control, adjustment, and configuration
- Display of current values (motor, I/O, etc.)
- Configuration storage and download
- Duplication of one drive configuration on another drive
- Remote use by means of appropriate accessories (see [page 11](#))
- Read/write values

Accessories and options

Accessories

Easy Altivar 610 drives are designed to take complementary accessories to increase their functionality.

- Plain text display terminal:
- Kit for mounting on enclosure door (see [page 11](#))

Options

Easy Altivar 610 integrates a certain number of I/O as standard (see [page 12](#)).

The following options can be added:

- Modules:
 - Extended I/O module (see [page 12](#)):
 - 2 analog inputs configurable as voltage, current, or probe
 - 6 discrete inputs
 - 2 discrete outputs
 - Extended relay module (see [page 12](#)):
 - 3 relay NO discrete outputs
 - Communication module (see [page 14](#)):
 - Profibus DP V1 bus
- Passive filters (see [page 15](#))
- Output filters:
 - dv/dt filters (see [page 16](#))

Motor starters

Schneider Electric offers combinations of circuit breakers and contactors to be able to use Easy Altivar 610 drives in optimum conditions (see [page 17](#)).

(1) These values are given for a nominal switching frequency of 4 kHz up to **ATV610D45N4**, or 2.5 kHz for **ATV610D55N4...C25N4** for use in continuous operation.

The switching frequency is adjustable from 2...12 kHz up to **ATV610D45N4**, or from 1...8 kHz for **ATV610D55N4...C25N4**. Above 2.5 or 4 kHz (depending on the rating), the drive will automatically reduce the switching frequency in the event of an excessive temperature rise. For continuous operation above the nominal switching frequency, derate the nominal drive current (see the derating curves in the [Installation Manual](#)).

(2) Typical value for the indicated motor power and for the maximum prospective line Isc.

(3) Values given for applications requiring a slight overload (up to 110% for 60 s or 120% for 20 s).

(4) Values given for applications requiring a slight overload (up to 150% for 60 s).

(1) These values are given for a nominal switching frequency of 4 kHz up to **ATV610D45N4Z**, or 2.5 kHz for **ATV610D55N4Z...C16N4Z** for use in continuous operation.
The switching frequency is adjustable from 2...12 kHz up to **ATV610D45N4Z**, or from 1...8 kHz for **ATV610D55N4Z...C16N4Z**. Above 2.5 or 4 kHz (depending on the rating), the drive will automatically reduce the switching frequency in the event of an excessive temperature rise. For continuous operation above the nominal switching frequency, derate the nominal drive current (see the derating curves [Installation Manual](#)).

(2) Typical value for the indicated motor power and for the maximum prospective line Isc.

(3) Values given for applications requiring a slight overload (up to 110% for 60 s or 120% for 20 s).

(4) Values given for applications requiring a slight overload (up to 150% for 60 s).

Plain text display terminal mounted on the front of an ATV610U07N4 drive

Plain text display terminal

Plain text display terminal

The plain text display terminal is supplied with ATV610●●●N4 drives. It can also be ordered as a spare part.

This terminal can be:

- Connected and mounted on the front of the drive
- Connected and mounted on an enclosure door using a remote-mounting accessory

This terminal is used to:

- Control, adjust, and configure the drive
- Display current values (motor, I/O, and process data)
- Store and download configurations (several configuration files can be stored in the memory)
- Duplicate the configuration of one powered-up drive on another powered-up drive

Other features:

- Displaying the device - via Web server and password; a display terminal is required to log in to the Web server for the first time
- Realtime clock providing data acquisition and event time-stamping functions
- 2 lines
- Languages (Chinese, English, French, German, Italian, Spanish)
- White backlit LCD screen
- Operating range: -15...50 °C/+5...122 °F
- IP21 protection
- Removable, easy plug-in with RJ45 port

Description

The front of the display terminal comprises:

- 1 LCD backlight screen
- 2 OK button: saves the current value (ENT)
- 3 RUN button: local control of motor run command
- 4 STOP/RESET button: local control of motor stop command/clearing detected errors
- 5 ESC button: aborts a value, parameter, or menu to return to the previous selection
- 6 Home: root menu
- 7 Turn ±: navigation dial, increases or decreases the value, goes to the next or previous line

PF142222

Remote mounting kit for mounting plain text display terminal on enclosure door (front panel)

PF142251

Remote mounting kit for mounting plain text display terminal on enclosure door (rear panel)

Door mounting kit for plain text display terminal

- Remote mounting kit for mounting on an enclosure door with IP43 degree of protection as standard

Description

The kit comprises:

- Tightening tool (also sold separately under the reference ZB5AZ905)
- 1 Mounting plate
- 2 RJ45 port for the plain text display terminal
- 3 Seal
- 4 Fixing nut
- 5 RJ45 port for connecting the remote-mounting cordset

Cordsets should be ordered separately depending on the length required.

Drilling a hole with a standard $\varnothing 22$ mm tool, as used for a pushbutton, allows the unit to be mounted without needing a cut-out in the enclosure ($\varnothing 22.5$ mm/ $\varnothing 0.89$ in. drill hole).

An anti-rotation function is provided that works as follows: when the kit is locked tightly on the panel by the nut, the gasket on the back cannot rotate.

Integrated I/O and I/O option modules

Presentation

Easy Altivar 610 integrates the following types of I/O as standard:

- 3 analog inputs 0...10 V/0...20 mA (software-configurable as voltage, current, temperature probe, and water level sensor)
- 6 digital inputs 24 V DC (2 of which can be programmed as pulse inputs)
- 2 analog outputs 0...10 V/0...20 mA (software-configurable as voltage or current)
- 3 relay outputs (configurable relay logic)

By installing I/O option modules, Easy Altivar 610 drives can meet the needs of applications that manage additional sensors or specific sensors.

Two I/O option modules are available:

- Extended I/O module
- Extended relay module

These I/O modules and the communication modules insert into slot A 1 on Easy Altivar 610 drives.

Extended I/O module

- 2 differential analog inputs configurable via software as current (0-20 mA/4-20 mA) or probe (PTC, PT100, or 2-wire or 3-wire PT1000) inputs
 - 14-bit resolution
- 6 x 24 V $\overline{\text{DC}}$ positive or negative discrete inputs
- Sampling: 1 ms max.
- 2 assignable discrete outputs

Extended relay module

- 3 relay outputs with NO contacts
- 1 fixed screw terminal block

(1) Differential analog inputs configurable via software as current (0-20 mA/4-20 mA) or probe (PTC, PT100, or 2-wire or 3-wire PT1000) inputs.

When configured as PTC probe inputs, they must never be used to protect an ATEX motor in applications in explosive atmospheres. Please refer to the Altivar Process ATV600, ATV900, and Modular ATEX guide.

(2) NO contacts.

Integrated ports and communication protocol

Presentation

- Easy Altivar 610 drives have two built-in RJ45 communication ports as standard:
- One port dedicated to field network operation for exchanging data with other devices via the Modbus serial link protocol **1**
 - A second dedicated port for the multidrop connection of the following HMIs and configuration tools **4**:
 - the plain text terminal
 - a Harmony industrial HMI terminal

Easy Altivar 610 drives integrate the Modbus serial link communication protocol as standard. The detailed specifications for serial communication ports and the Modbus protocol are available on [our website](#).

Description

- 1** RJ45 serial port
- 2** Slot A for extended I/O or communication modules
- 3** Fixed screw terminal blocks for 24 V \square power supply and integrated I/O
- 4** RJ45 serial link for HMI (remote plain text terminal, Magelis terminal, etc.)

Easy Altivar 610 drives can take one communication module, or digital and analog I/O option module, or relay output module in slot A.

Note: The user manuals and description files (gsd) for devices on the communication buses and networks are available on [our website](#).

PROFIBUS DP communication module VW3A3607

PROFIBUS DP communication module

Presentation and functions

Easy Altivar 610 drives can also be connected to other industrial communication buses and networks using the communication module available as an option. This communication module is supplied in "cassette" format for ease of mounting/removal.

Dedicated communication module: PROFIBUS DP.

The PROFIBUS DP V1 module also supports the Profidrive and CiA402 profiles.

It is possible to maintain communication using a separate power supply for the control and power sections. Monitoring and diagnostics are possible via the network even if there is no power supply to the power section.

All drive functions can be accessed via the various communication networks:

- Configuration
- Adjustment
- Control
- Monitoring

Easy Altivar 610 drives offer a high degree of interfacing flexibility with the possibility of assigning, by configuration, the different control sources (I/O, communication networks, and HMI terminal) to control functions in order to meet the requirements of complex applications.

Communication is monitored according to the specific criteria for each protocol.

However, regardless of the protocol, it is possible to configure how the drive responds to a detected communication interruption as follows:

- Define the type of stop when a communication interruption is detected
- Maintain the last command received
- Ignore the detected communication interruption

Easy Altivar 610 drive with passive filter

Presentation

Passive filters are used to obtain total harmonic distortion of less than 10%. Reactive power increases at no load or low load. To help reduce this reactive power, the filter capacitors can be disconnected (see the diagrams on [our website](#)). Passive filters provide IP20 protection.

Applications

Reduction of current harmonics in order to use drives in the first environment (restricted distribution, domestic applications).

Passive filters: 400 V 50 Hz three-phase supply

dv/dt filter

Easy Altivar 610 drive with dv/dt filter

To limit the impact of dv/dt filters and overvoltages at the motor side, it is recommended, for cables longer than 50 m/164 ft, that you check the motor insulation type and add an output filter if necessary.

Output filters are used to limit dv/dt at the motor terminals.

They are also used to:

- Limit overvoltages at the motor terminals to:
 - 1,000 V at 400 V ~ (rms value)
- Filter interference caused by opening a contactor placed between the filter and the motor
- Reduce the motor ground leakage current

The performance of dv/dt filters will be affected if the maximum cable lengths are exceeded. For an application with several motors connected in parallel, the cable length must include all cabling. If a cable longer than that recommended is used, the dv/dt filters may overheat.

(1) The filters are designed to operate in a switching frequency range of between 2 and 8 kHz.

(2) Values given depend on the nominal switching frequency of the drive. This frequency depends on the drive rating. These cable lengths are given as examples only as they can vary depending on the application. They correspond to motors conforming to IEC 6034-25 and NEMA MG1/31.2006.

ATV610D55N4

Applications

Circuit breaker/contactors/drive combinations help to ensure continuity of service in an installation. The type of circuit breaker/contactors coordination selected can help reduce maintenance costs in the event of a motor short-circuit on the drive input by minimizing the time required to make the necessary repairs and the cost of replacement equipment. The suggested combinations provide coordination according to the drive rating.

The drive controls the motor, provides a monitoring function against short-circuits between the drive and the motor, and helps protect the motor cable against overloads. Overload monitoring is provided by the drive's motor thermal monitoring function if this has been enabled. Otherwise, an external monitoring device such as a probe or thermal overload relay should be provided. The circuit breaker helps protect the drive's power cables against short-circuits.
