

## **Datasheet**

## **RS PRO Industrial Cable**

Stock No: 201-2228

Part No: 201-2228

Description: 12 core 0.5mm<sup>2</sup> unscreened PVC insulated and sheathed

industrial cable.

Applicable Standard: Defence Standard 61-12 Part 5.

Conductor: 16/0.2mm tinned copper (nominal construction).

Insulation: PVC, 0.45mm nominal thickness to 1.83mm nominal diameter.

Core colours: Red, Blue, Green, Yellow, White, Black.

Lay-up: Cores twisted together with overall polyester tape.

Sheath: PVC, 0.90m nominal thickness to 7.4mm nominal diameter.

Voltage Rating: 440V at frequencies up to 1.6KHz.

Conductor Resistance:  $40.1\Omega$ /km max at  $20^{\circ}$ C.

Insulation Resistance:  $11M\Omega$ .km min at  $20^{\circ}$ C.

Temp range:  $-15^{\circ}$ C to  $+85^{\circ}$ C.

Current Rating: Current carrying capacities for multi-core cables are not given

owing to the varied conditions of loading and construction. However, for guidance, where a single core of a multi-core cable

is loaded, thecurrent in a 16/0.2 mm conductor should not

exceed 2.5 Amps.
