15W AC to DC Converter - PCB Mount

multicomp PRO

Features

- Universal Input: 85V AC to 264V AC/100 370V DC
- Operating temperature range: -40°C to +70°C
- High isolation voltage up to 4K V AC
- · Regulated output, Low ripple & noise
- Output short circuit, over-current, over-voltage protection
- · High efficiency, high reliability
- Plastic case, meets UL94V-0
- EMI performance meets CISPR32 / EN55032 CLASS B
- IEC62368, UL62368, EN62368 standards approval

This is a 20W compact size power converter with ultra-slim volume. It features universal input voltage, taking both DC and AC input voltage, low power consumption, low ripple& noise, high efficiency, high reliability, 4000V AC safer isolation. It offers good EMC performance, meet IEC/EN61000-4, CISPR32/EN55032, UL62368 and EN62368 standards, and widely used in industrial, electricity, instruments, telecommunication and civil applications. Note: Please refer to Design Reference when module being used in a bad EMC environment.

Output Filter Components:

- Output filtering capacitor C2 is electrolytic capacitor, it is recommended to apply electrolytic capacitor with high frequency and low resistance. For capacitance and current of capacitor please refer to manufacture's datasheet. Capacitor voltage reduced to at least 80%. C1 is ceramic capacitor, which is used to filter high-frequency noise. TVS is a recommended component to protect post-circuits if converter fails.
- The product in the application must connect external electrolytic capacitors C2, to achieve lower ripple noise and better dynamic load performance.
- When the product's output terminal is connected to high frequency switch type load, electrolytic capacitor C2's selection is as following:

| Model | C2 | |
|----------------|-----------------------------|--|
| MP-LDE15-20B03 | | |
| MP-LDE15-20B05 | 470μF/16V (Solid capacitor) | |
