Wiha – our goal: your success

- **Your guarantee for quality**
Winner of the Manufacturing Excellence Awards 2014 as the best SME in Germany.
- **Reliable and dependable**
German family-owned company with more than 80 years of experience.
- **Your advantage**
Customised problem-solving for professionals.
- **Cutting-edge technology**
Award-winning innovations valued by professionals throughout the world.

What makes your work easier? Tools that increase your efficiency, reduce costs and preserve your health. This is why Wiha develops, designs and manufactures products that meet the highest functionality, durability and ergonomic demands.

Founded over 80 years ago as a small family-owned business for standard parts and screws, Wiha has grown to become a global company with factories all over Europe, Asia and the United States and are still owner-operated by the Hahn family.

Wiha offers the professional a wide range of high-quality premium tools, characterized by their use of the latest manufacturing technologies, application-oriented innovations, ergonomic superiority, top quality, absolute reliability and long service life. In short, tools that make your work noticeably easier - tools that work for you.

Learn more about Wiha on our website:
www.wiha.com

VDE-insulated tools from Wiha

To work safer, more efficiently and with less strain on the body.

Certified safety – from our own safety testing procedure according to IEC standards.

Voltage testing: All Wiha VDE-tools, which have special markings, are individually tested at 10,000 V AC and are approved for 1,000 V AC and 1,500 V DC.

Cold shock test: Cooling down to -25° C. The skinning material must retain its toughness, so that it doesn't break when subjected to shock and knocks.

Test of electrical skinning properties: 24 hours storage in water, then 3 minutes test at 10,000 V AC. There must neither be flashover nor disruptive discharge.

Test of the adhesion of the skinning material coating: 168 hours storage at 70° C, then test of adhesion at 500 N.

Pressure tests: Test at 20 N pressure load, 70° C temperature and 5,000 V AC test voltage. No disruptive discharge may occur.

Test of combustion behaviour: The tools are subjected to a flame for 10 seconds. The skinning material must then extinguish and not continue to burn.

Safety note

The following equipment is required for all work on or around live components and should be appropriate for the specific task

- insulating personal protective equipment
- insulating safety mechanisms
- insulated tools

Before starting work, you must disconnect all active, live components of electrical machines and equipment and ensure that they remain disconnected while you carry out the work.

This is achieved by complying with the five safety rules:

- disconnect
- secure against reconnection
- ensure power is switched off
- earth and short-circuit
- cover or block off adjacent live components

As an internationally recognized institute, the VDE is responsible for the testing and certification of electrotechnical products. Wiha provides the professional with a broad range of VDE products, developed and continuously optimized specifically for electricians, which also provide application-oriented solutions for everyday use.

The Wiha quality-management system according to ISO 9001:2015 ensures that only first-class products are manufactured – and that you can work with products of excellent quality. To ensure maximum safety for the user, the entire Wiha VDE range must undergo the most stringent inspections and individual tests. All Wiha VDE-tools hold multiple certifications: The VDE-GSmark stands for safety with regard to any risk, from electrical right up to radiological. Products labelled with a double triangle and a voltage range are suitable for work with live parts.

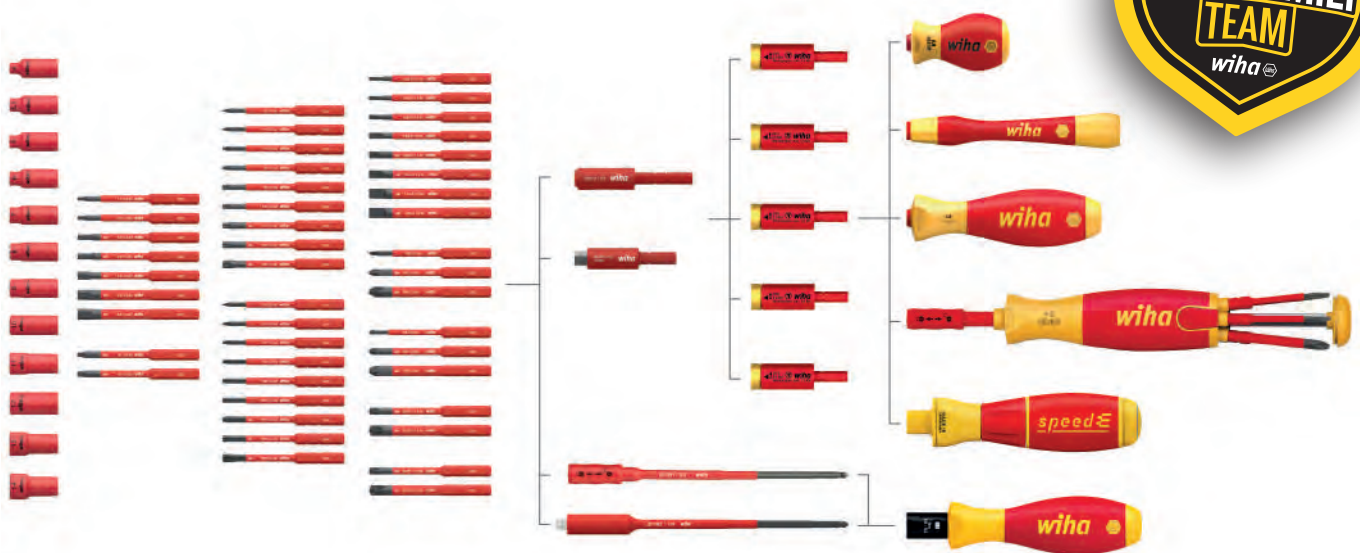

The international standard IEC 60900 defines the construction, safety as well as single, series, and random testing of insulated tools. But with Wiha you don't just work safer, but also healthier and more efficiently. Specially developed ergonomic geometries ensure comfortable handling that protects the body from strain. The result: easier work, less signs of fatigue, more efficiency.

83 professionals. One system.
ElectricVario family by Wiha.

There has never been a team with so many exceptional players: the ElectricVario Family by Wiha unites all fastening tools that electricians need for all the challenges in their job. These include many new members to complete the team. The best thing about them: Thanks to the countless combination possibilities, the tools can be used flexibly and thus save valuable time and space. Combinable with one another, the tools also ensure safe screw-fastening on live parts thanks to their insulation. The ergonomically shaped screwdriver handles also help to protect the user's muscles. Professional users play in the Premier League when they use ElectricVario Family products. They can always be identified via the ElectricVario Family logo.

- **Increases your efficiency**
Various usage options for all fastening procedures and application fields.
- **Offers you full protection**
Internationally award-winning VDE-insulated tools, each individually tested at 10,000 V AC and approved for use at 1,000 V AC.
- **Increases your safety**
Wiha slimBits ensure unrestricted and fully insulated access to low-lying screws.

Increases your efficiency

A wide range of tools – so the right one is always to hand when you need it.

Protect your health

The patented and multiple award-winning Wiha SoftFinish® handle size concept prevents occupational illnesses as work is kind to hands and muscles. Recommended by German doctors and therapists from the AGR! (Healthy back association)

Offers you full protection

Each tool individually tested at 10,000 V AC and approved for 1,000 V AC.

Increases your safety

Wiha slim tools ensure full and fully-insulated access to low-lying screws.

The range. Cases that really deliver.

The professional often has reservations about conventional tool boxes: too inaccessible, little storage space, not robust enough. Deficiencies that Wiha has taken to heart – and eliminated – in the development of its case sets.

Wiha cases therefore combine many good qualities: Stable inline rollers allow easy and stress-free transportation of tools. The durable PP-plastic with reinforced plastic elements ensures a long lifespan. Gas-filled shock absorbers hold the cover in all positions and reduce the risk of injury when closing. Tool trays ensure quick and easy access to the tool, the case itself provides a lot of extra storage space for small items and machines. And, last but not least, you can easily access the right tool, whenever it is needed.

"A case with all major Wiha tools and innovations - like Christmas for the electrician!"

Rolf Muschal

Your entire workshop - now you can take it with you!

Whether next door or at the most remote site: It's great if the tool you need is quickly at hand. Compact, handy and robust, the Wiha toolbox set ensures access to the tools you require, at any time and in any situation.

Specially compiled according to varying requirements and applications, the Wiha toolbox sets have one thing in common: All include high-quality tools in proven Wiha quality, guaranteeing easy and efficient working.

Ergonomic in design, durable in material and processing, and safe thanks to rigorous and extensive safety test procedures, Wiha tools prove to be a practical and indispensable companion for the electrician, especially in their toolbox set.

- **Increases your efficiency**

A wide range of tools – so the right one is always to hand when you need it.

- **Meets your requirements**

Robuust, groot, duurzaam en veilig met dekselhouder

- **Lowers your costs**

The correct torque avoids damaging material and no follow-up work is necessary.

- **Offers you full protection**

Internationally award-winning VDE-insulated tools, each individually tested at 10,000 V AC and approved for use at 1,000 V AC.

Meets your requirements: Case: robust, large, stable and secure with lid brake. **Lowers your costs:** The correct torque protects material from damage and ensures no additional follow-up work. **Increases your safety:** Internationally award-winning VDE-insulated tools, each individually tested at 10,000 V AC and approved for use at 1,000 V AC. Gas-filled shock absorbers hold the lid in all positions and reduce the risk of injury when closing. **Protect your health:** Wiha pliers require less force and reduce pressure on wrists. Ergonomic handle design makes work easier and prevents occupational illnesses. Trolley with stable in-line rollers allow easy and stress-free transportation of tools to the work area. **Increases your efficiency:** A comprehensive tool assortment, always providing you with the right tool when it is needed. The design and function of the tool trays guarantee quick and easy access to tools. **Increases your flexibility:** Ample space for additional tools and lots of storage for small parts and machines.

Increases your efficiency

Wiha screwdrivers offer an optimal balance between power and control thanks to their unique handle size concept.

Saves money

By using the correct torque value, torque tools protect against material damage and reworking.

Protect your health

The patented and multiple award-winning Wiha SoftFinish® handle size concept prevents occupational illnesses as work is kind to hands and muscles. Recommended by German doctors and therapists from the AGR! (Healthy back association)

Offers you full protection

Each tool individually tested at 10,000 V AC and approved for 1,000 V AC.

Increases your safety

Wiha slim tools ensure full and fully-insulated access to low-lying screws.

Fastening / jamming

We have the know-how at the tip of our fingers.

The ergonomic quality of a tool is never quite so apparent as when fastening and clamping. Under the motto "A grasp on turning" Wiha presents an innovative handle size concept which breaks new-ground in terms of individual user comfort.

Many commonly available screwdrivers are not designed to meet the needs of users. This results in disadvantages in guiding the tool as well as in transmitting force while fastening. In contrast, the Wiha SoftFinish® concept works with four different handle sizes: Thus, each handle has a perfectly-correlated ratio of guidance, speed and torque for any task.

The Wiha slimTECHNOLOGY offers additional comfort, permitting unrestricted access to each screw with 33 % slimmer blades.

The speedE® II e-screwdriver proves itself to be the ideal tool for virtually every screw-fastening task. Whether handling delicate fastenings, long screws or an extremely large number of screws, professionals can do their job faster while working with the e-screwdriver.

"The speedE® II is my most trusted partner in my daily work. Especially at the end of a long workday, it not only saves energy but also time, as I can work significantly faster with it. In addition, it has two power transmission levels* and due to the different colours of the bits, I immediately know which one to use without damaging the material. Thanks to the speedE® II, working error-free and gently is no longer the exception but the rule."

Simon Furrer, WorldSkills 2017 World Champion in Abu Dhabi, Industrial Control Category

Fast has never been this unique.

**THE
ORIGINAL
NOW EVEN
STRONGER**

- **Increases your speed**

- **Protects your material**
Electric screw fastening with protective function to prevent damage to materials.

NEW
MORE
POWER

Several fastenings per day, hundreds of fastenings per week. Professional craftspeople invest a great amount of time and energy in recurring fastening tasks. The resulting pain in wrists is the body's natural reaction. Thanks to the electric drive of the e-screwdriver speedE® II, joints and tendons are protected, especially during continuous use. In addition, the required time is reduced to one-third. An extra highlight of the speedE® II is the integrated material function. Sensitive fastenings, for example, plastic socket covers, must not be tightened too hard or the material will be damaged. In such cases, the speedE II automatically switches off at 0.4 Nm and gives the user full control to carefully carry out the final fastening by hand. If there are fastening tasks that require more force, the second generation speedE® offers the option of increasing the electric force to 1.0 Nm via a sliding switch. The colour of the slimBits serves as an aid for adjusting the correct force level to the respective application. The red slimBits with the smaller profiles are used in the red slide position, while the yellow Power SlimBits with the larger profiles indicate that in this case, the more powerful yellow slide position can be used. However, if more force is required, the speedE® can be manually used up to 12 Nm without incurring any damage. During the fastening, the integrated LED light provides permanent illumination for an optimal view of the

screw. This way, in poorly lit work environments the powerful LED can be used as a flashlight by tapping on the ring switch. The enlarged ring switch and smooth rotation ensure even easier handling. Thanks to the combination of facilitated handling and the ergonomic SoftFinish® handle design, the e-screwdriver speedE® II is recommended by doctors and therapists from the German Campaign for Healthier Backs. The set contains both a red and yellow slimBit, a USB battery charger, as well as two standard 18500 batteries, which ensures continuous working.

E-screwdriver, speedE® II electric

Meets your requirements: Quality and robustness made in Germany. **Simplifies your work:** Maximum illumination of the working area thanks to the LED ring light. **Makes handling easier:** Unique ring switch allows operation in all working positions. **Protect your health:** Gentle on hands and muscles. Recommended by doctors and therapists at the German Campaign for Healthier Backs! **Increases your efficiency:** 100% compatible with the Wiha Electric Vario family. **Offers you full protection:** slimBits tested at 10,000 V AC and approved for 1,000 V AC. **Increases your speed:** Work completed 3 times as fast thanks to the electric drive. **Protects your material:** Electric screw fastening with protective function to prevent damage to materials.

Fastening / jamming

There are moments when you need to control your power.

Power is good. Controlled power is better. The fully certified Wiha VDE torque screwdriver systems TorqueVario®-S and TorqueVario®-S TR combine precision with safety: With a distinctly audible and perceptible click signal when the torque value is reached. With a release accuracy of $\pm 6\%$ of the set scale value, Wiha VDE screwdrivers meet the accuracy requirements of EN ISO 6789. Uncompromising safety is ensured in production and testing according to IEC 60900, VDE/GS certification and individual product testing at 10,000 V AC.

- **Increases your efficiency**

Using the correct torque prevents from rework and damaged material.

Fastening / jamming

All bits in the handle, always and everywhere.

Why make things complicated, when they can be compact? The practical Wiha LiftUp electric magazine bit holder accommodates up to six common insulated slimBits - and is therefore the ideal portable companion for every electrician. The bit magazine is unlocked at the touch of a button on the two rockers, and the slimBits can easily be removed and re-inserted. A reliably locked magazine prevents anything from being lost when on the move. The rotating cap is used to make working easier: Additional axial force can be exerted by pressing strongly with the hand against the cap, while rotating around the longitudinal axis with the other hand. Uncompromising safety is ensured in production and testing according to IEC 60900, VDE/GS certification and individual part testing at 10,000 V AC.

The Wiha magazine bit holder LiftUp electric is available in two content variants (SL/PH or SL/PH/PlusMinus PZ)

- **Increases your efficiency**

Wiha LiftUp electric, saves 75 % volume and 50 % less weight for 100 % efficiency.

- **Protect your health**

No risk of injury, all blades stowed safely inside the handle.

- **Offers you full protection**

Each tool individually tested at 10,000 V AC and approved for 1,000 V AC.

- **Increases your safety**

Wiha slimBits grant unhindered, fully insulated access to deep lying screws.

Increases your safety: Wiha slimBits ensure good, protected access to deep-set screws. **Protect your health:** No risk of injury, all blades stowed safely inside the handle. **Increases your efficiency:** Wiha LiftUp electric saves 75% volume and 50% less weight for 100 % efficiency. **Offers you full protection:** Each tool individually tested at 10,000 V AC and approved for 1,000 V AC.

VDE interchangeable bit system

- Compact VDE bit sets: holder + slimBit (length 75 mm)
- Wiha slimBits ensure good, protected access to deep-set screws.
- slimBits tested at 10,000 V AC and approved for 1,000 V AC.
- Space saved thanks to extensive interchangeable bit system and nut driver inserts.

VDE torque system

- Controlled tightening of electrical screw connections

Easier and protected access to deep-set screws.

Wiha slimTECHNOLOGY enables blades to be up to 33 % slimmer due to the integrated insulation in the blade. Low-lying screw and spring elements in the critical working area can therefore be reached easily. The high-quality blade insulation guarantees safe work in on live parts up to 1,000 V AC/1,500 V DC. Additional safety is assured as each individual screwdriver is tested in a water bath at 10,000 V AC in accordance with IEC 60900.

Roll-off protection, the patented, SoftFinish® handle design that protects the hands and muscles from strain, and the unique handle-length concept for optimal balance between power and control all ensure healthier and more efficient work.

The system for every electrician. Available as a screwdriver or as an interchangeable bit system

- **Increases your efficiency**

Unique Wiha handle-length concept for optimum balance of torque and control.

- **Protect your health**

With the patented SoftFinish® handle design, ensuring work is kind to hands and muscles. Recommended by doctors and therapists at German Campaign for Healthier Backs.

- **Offers you full protection**

Each tool individually tested at 10,000 V AC and approved for 1,000 V AC.

- **Increases your safety**

Wiha slim blades grant unhindered, fully insulated access to low lying screws.

Increases your safety: Wiha slim blades ensure unlimited, protected access to deep-set screws. **Protect your health:** With the patented SoftFinish® handle design, ensuring work is kind to hands and muscles. Recommended by doctors and therapists at German Campaign for Healthier Backs. **Increases your efficiency:** Unique Wiha handle-length concept for optimum balance of torque and control. **Offers you full protection:** Each tool individually tested at 10,000 V AC and approved for 1,000 V AC.

INFOBOX: Handle size concept

Wiha SoftFinish® handle sizes

- Every Wiha handle optimally balances guidance, speed and torque for the respective fastening task.
- Quick-turning - Motor skills are consistently taken into consideration.
- Maximum power transmission: comfortable and loss-free transmission of physical strength, even during intensive fastening.
- The power-turning and quick-turning zones vary significantly

over the four handle sizes in various forms.

- The Wiha SoftFinish screwdrivers enable work that is kind on the hands and muscles and is therefore recommended by doctors and therapists from the AGR.

Increases your safety: Wiha slim blades ensure unlimited, protected access to deep-set screws. **Protect your health:** With the patented SoftFinish® handle design, ensuring work is kind to hands and muscles. INFOBOX: Solid steel cap and hexagon head

- The solid steel cap at the end of the screwdriver handle enables targeted hammering, e.g. to loosen jammed screws.
- The direct connection of the solid steel cap to the blade means that the impact energy is transmitted without any loss.
- Blade includes a hexagon bolster for using a set of spanners for additional torque.

Fastening / jamming

Three.For all your jobs.

Which machine? Which application? Which bit? The revolutionary Wiha bit concept puts an end to any confusion and presents three bit types which can cover all areas of use.

Only the screw shape is crucial for selecting the bit.

The Y bit is ideal for fastening Y-shaped screws with an angle no greater than 90° between the thread and screw head. The T bit is used for T-shaped screws at a 90° angle. If you need to fasten both screw types, then the TY bit is the right choice since this universal bit is suitable for all type of fastenings.

- **Increases your efficiency**

The specialist with 120x greater lifespan* thanks to optimised bits. * Compared to Wiha standard bits

- **Lowers your costs**

Bit quick and easy to find thanks to marking – even in dark environments when a UV light is used.

- **Saves time**

No long searches thanks to fluorescent bit, infrequent bit replacement thanks to long lifespan.

Lowers your costs: Bit quick and easy to find thanks to red marking – even in dark environments by using an UV light. **Saves time:** No long searches thanks to fluorescent bit, infrequent bit replacement thanks to long lifespan. Automatic opening at the push of a button and simple bit change directly in the holder. **Increases your efficiency:** The all-rounder with 120x greater lifespan* thanks to patented bit technology, suitable for all screws. (*compared to Wiha standard bit)

Perfect order when fast work is required.

Perfect order and easy handling - the ErgoStar L-key holder provides both: Rotating a single L-key in the holder means that all other keys rotate at the same angle! Keys sitting next to each other no longer need to be disentangled. Instead, all keys are ready for removal with one turn - as fast and easy as never before. The keys of the ErgoStar also help to make work significantly easier: The Wiha L-key set, made of fully hardened chrome vanadium steel, includes an innovation that will convince everyone. A spring steel ring holds hexagon screws reliably.

- **Simplifies your work**

The ball end facilitates access to screws and allows you to work at an angle of up to 25°.

- **Increases your efficiency**

Wiha MagicRing® retaining function holds all screws firmly in place – without any magnets.

- **Makes handling easier**

Always the correct key when you need it.

- **Saves time**

Ensures order: removing and targeted insertion in the holder is child's play.

Simplifies your work: The ball end facilitates access to screws and allows you to work at an angle of up to 25°. **Lowers your costs:** Reduces the risk of forgetting and leaving keys inside a machine and causing damage. **Makes handling easier:** Always the correct key when you need it. **Increases your efficiency:** Coloured L-keys quick and easy to find – also in dark environments thanks to fluorescent paint visible in UV light. The required key width can be quickly found thanks to colour coding. Wiha MagicRing® holding feature holds all hex screws in place without a magnet.

Protect your health:

Special DynamicJoint® design reduces effort required for cutting.

Protect your health

Wiha pliers are kind to the muscles and ergonomic to work with, permanently reducing wrist strain.

Offers you full protection

Each tool individually tested at 10,000 V AC and approved for 1,000 V AC.

Trimming / cutting

A cut above the rest with Wiha.

A precise cut at the right time – no problem for Wiha diagonal cutters, heavy-duty diagonal cutters, cable cutters, cable shears and combination pliers. With the perfect combination of high-quality materials and ergonomic comfort, Wiha VDE-tools withstand the toughest demands. Production is in accordance to the state-of-the-art quality management guidelines. A special heat treatment and inductive hardening of the parts under high stress ensure a long lifespan. The precise interaction of the joints and the exacting quality workmanship of the blades and gripping surfaces ensure the highest level of functionality.

All Wiha products have been designed according to the latest findings in ergonomics. Ergonomic handles and well thought-out soft and hard zone distribution makes for work that protects the hands from strain and is comfortable.

"With BiCut[®], I always have sufficient power when cutting - and without aching fingers."

Timo Schweitzer

Double your power at the push of a button.

Precise and safe work – at double the power: no problem for the Wiha BiCut® Professional electric diagonal cutters. If there is not enough power when cutting, or if cutting is laborious, a simple push of a button is all that is required and the cutting power is doubled. Another push of the button, and the power is halved again – easy! This significantly reduces the risk of cramp or slippage when applying too much force. The extra-wide back for the handle, with perfectly distributed soft and hard zones, ensures the optimum ergonomics. The new Wiha BiCut® has already been awarded with the “reddot award 2014 winner” for outstanding design quality.

- **Increases your efficiency**
Two pliers in one - 200 % power at the touch of a button, available at any time.
- **Protect your health**
Requires less force and reduces pressure on the wrists.
- **Offers you full protection**
Each tool individually tested at 10,000 V AC and approved for 1,000 V AC.

Lowers your costs: Durable thanks to high-quality, chrome-plated plier surface to prevent corrosion. **Protect your health:** Requires less force and reduces pressure on the wrists. **Increases your efficiency:** Two pliers in one - 200 % power at the touch of a button, available at any time. **Offers you full protection:** Each tool individually tested at 10,000 V AC and approved for 1,000 V AC.

Wiha gripping pliers enable safe, non-slip gripping in all work situations.

Protect your health:

DynamicJoint®: Special DynamicJoint® design reduces effort required for cutting.

Offers you full protection

Each tool individually tested at 10,000 V AC and approved for 1,000 V AC.

Supplying / holding

Supplying – completely relaxed.

In the supplying and holding working procedures, Wiha pliers prove to be clever helpers for relaxed and efficient work. For instance, the OptiGrip of the combination and high-leverage combination pliers ensure optimal and secure holding using an innovative gripping surface: The unique 'triple-point support' protects the work piece from twisting or slipping. The circlip pliers from the Classic Series with their MagicTips® precision tips made of high-performance steel offer considerable additional safety and stability. Their special latching function is especially useful against in preventing the circlips jumping off.

“You only have to lose a circlip, and then you realize the benefits of Wiha pliers!”

Frank Scheck

INFOBOX: Plier wrench

- Required width setting directly on the work piece with no need to press any buttons.
- Ratchet principle allows users to fasten screws rapidly with a simple glide.
- Thanks to its slim design and button-free setting, it is ideal for use in tight spaces.
- Smooth, parallel-acting jaws prevent damage on sensitive surfaces.

For those situations where a good grip is essential.

They make our circlip pliers for the Classic series head and shoulders above the rest: MagicTips®, the precision tips made of high-performance steel. Additionally hardened, they offer a high level of resistance to wear and therefore ensure a long shelf-life. The special latching feature is as unique as it is useful, and prevents jumping of the circlips - and therefore any reworking in the motor or working space caused by lost circlips. And thanks to the non-slip pliers handle, precise work is also guaranteed in unfavourable situations. Hard as nails, durable, safe, accurate: These qualities make Wiha MagicTips® circlip pliers useful and indispensable helpers during day-to-day work.

- **Lowers your costs**
Prevents damage caused by lost circlips in the work area.
- **Saves time**
Safe and sturdy grip on circlips.

Lowers your costs: Prevents damage caused by lost circlips in the work area. **Saves time:** Safe and sturdy grip on circlips.

Protect your health

Wiha pliers are kind to the muscles and ergonomic to work with, permanently reducing wrist strain.

Lowers your costs

Thanks to the integration and combination of several operations in one tool, this removes the need for several tools.

Offers you full protection

Each tool individually tested at 10,000 V AC and approved for 1,000 V AC.

Stripping/ insulating / crimping

For tidy cable ends.

Wiha crimping tools guarantee clean, precise crimping of components. Wiha offers a range of crimp tools for a great variety of applications, including wire-end sleeve, male blade connectors as well as cable eyes and contacts. A special highlight are the automatic crimping pliers with hex crimping for processing wire-end sleeves with and without insulating collars. Due to the large crimping range from 0.08 – 16 mm² only one tool is required for working on wire-end sleeves with larger and smaller diameters. At the same high quality level as the the automatic crimping pliers, the crimp tools for cable eyes, contacts and male blade connectors also guarantee absolute crimping process safety coupled with comfortable work thanks to their impact-reducing plastic handles. The "electrical engineering accessories" product range offers the ideal solutions to complement the crimp tools, including superior quality innovatively packaged wire-end sleeves and connectors.

"Due to the large crimping range of the automatic crimping pliers I always have the right tool for practically all wire-end sleeves at my disposal. Even with wire-end sleeves with small diameters, the crimping process is problem-free thanks to the feed aid."

Ralf Flaig

Three functions – one tool.

Less tools means less weight, better handling and more efficient work. The Wiha Professional electric TriCut installation pliers combine three tools in one, ideal for the three operations cutting-to-length, stripping and skinning. And it does all this while saving you energy: Due to an ergonomically shaped, specifically angled plier head forged from high-quality steel. The low-wear, inlaid joint with heavy-duty riveting makes the pliers particularly robust and durable, and production and testing according to IEC 60900, VDE/ GS certification and individual piece testing at 10,000 V AC ensures uncompromising safety.

- **Simplifies your work**

The angled shape of the head allows work to be performed in hard-to-reach spaces such as installation boxes.

- **Increases your efficiency**

Three tools in one. Saves 60% volume and 50% less weight for 100% efficiency.

- **Lowers your costs**

Now you only need one tool for three tasks: cutting to length, stripping and skinning.

- **Offers you full protection**

Each tool individually tested at 10,000 V AC and approved for 1,000 V AC.

Stripping/insulating / crimping

Installation pliers TriCut Professional electric

Simplifies your work: The angled head allows you to work in hard-to-reach places such as installation sockets. **Lowers your costs:** Durable thanks to high-quality, chrome-plated plier surface to prevent corrosion. **Saves money:** Now you only need one tool for three tasks: cutting to length, stripping and skinning. **Increases your efficiency:** Three tools in one. Saves 60% volume and 50% less weight for 100% efficiency. **Offers you full protection:** Each tool individually tested at 10,000 V AC and approved for 1,000 V AC.

Stripping/insulating/
crimping

For a safe connection.

There are many pitfalls in conventional wiring installation. All-too-familiar problems include wires skinned incorrectly, twisted crimps in the pliers or poorly pressed sleeves. The comprehensive set by Wiha provides you with the right professional tools, including a wide selection of the most commonly used connectors and wire end sleeves, clearly arranged in an assortment case for portable use or for vehicles. Wiha's automatic stripping pliers promise to deliver "Skinning made easy". Users can skin cables ranging between 0.03 and 16 mm² with just one set of pliers. The automatic crimping pliers with hex crimping can handle wire-end sleeves between 0.08 and 16 mm² and twin wire end sleeves up to 10 mm². The automatic crimp tool for insulated cable eyes and contacts is designed for a crimping range between 0.5 and 6 mm² and thus covers most applications in the small and medium cable gauge range. Wiha's standard-compliant wire end sleeves and connectors offer heat resistance up to 105 °C.

- **Increases your process safety**
Consistently high processing quality for permanent safe contact.
- **Makes handling easier**
Quick, easy cable insertion thanks to funnel sleeve.
- **Increases your safety**
Cable breakages prevented thanks to protected individual wires. High thermal resistance up to 105 °C.
- **Increases your efficiency**
Automatic stripping and crimping tool for a wide range of coverage from 0.08 - 16 mm². Comprehensive assortment of wire end ferrules and cable connectors in a clear and mobile assortment box.
- **Increases your work quality**
Gas-tight connections thanks to perfect combination of professional tools and high quality connectors.

Wire end sleeves with plastic collar set

Simplifies your work: Easy removal and safe storage thanks to the pocket box with latching twist cap. **Increases your safety:** Cable breakages prevented thanks to protected individual wires. High thermal resistance up to 105 °C. **Makes handling easier:** Quick, easy cable insertion thanks to funnel sleeve. **Increases your efficiency:** Ideal for mobile use thanks to compact, stackable pocket box. **Increases your process safety:** Consistently high processing quality for permanent safe contact.

Simplifies your work

Torch with integrated laser makes it easier to fix positions more precisely and project measurements for ceiling installations, for example. Perfect light positioning thanks to lamp head swivelling in an L shape.

Simplifies your work

Comfortable measurement in different work positions thanks to the ingeniously positioned scales, even when viewed from above.

Surveying/marketing/measuring/checking

This is what we call precision work made to measure.

Wiha measurement and testing devices prove to be dependable helpers during electrical installation work. The multi-functional torch impresses in three ways thanks to its integrated laser, UV light and LED light with two lighting levels. With variable distance marks, the Wiha electrician's spirit level can reach across up to four flush boxes. Thanks to its ingeniously positioned scale, it allows users to make measurements effortlessly from different work positions. Users are guaranteed to see bubbles perfectly, even from a sharp angle. The Wiha electrician's folding ruler provides a scale for up to three flush boxes and edge distance marking at 150 mm. It can also be used to route cables into hard-to-reach installation locations. With its florescent coating, the folding ruler is also quick and easy to find in the dark with a UV light.

"The Wiha spirit level is a big hit! I can see the bubbles perfectly even when taking measurements above my head. I can also mark out measurements without needing to take a break."

Ralf Kästle

Surveying / marking /
measuring / checking

Even the most experienced professional tradesmen find it difficult to work efficiently in poorly lit work environments. The Wiha multi-functional torch sheds light on things in three ways: It features an integrated laser, UV light and LED light with two lighting levels. It is thus a compact, universal work tool which replaces several instruments in a single device. The integrated laser offers a great advantage, providing detailed positioning and easy transmission of measurements for tasks such as ceiling installations. This torch is even more practical for portable use thanks to the retaining clip, magnetic positioning and swivelling lamp head used to point the light in the required direction. Compact, light and multi-functional, the Wiha torch ensures optimum illumination for perfect vision and positioning.

- **Simplifies your work**

Retaining clip and magnetic positioner on the lid allows you to keep hands free for other tasks.

- **Simplifies your work**

Integrated laser makes it easier to fix position more precisely and project measurements for ceiling installations, for example. Perfect light positioning thanks to lamp head swivelling in an L shape.

- **Increases your efficiency**

Very strong LED lamp – two light intensities to adjust to light conditions as required. Includes laser and UV light.

- **Increases your safety**

Power-on time of 2 seconds prevents the laser being activated by accident.

Flashlight with LED, laser and UV light

Simplifies your work: Retaining clip and magnetic positioner on the lid allows you to keep hands free for other tasks. Integrated laser makes it easier to fix position more precisely and project measurements for ceiling installations, for example. Perfect light positioning thanks to lamp head swivelling in an L shape. **Increases your safety:** Power-on time of 2 seconds prevents the laser being activated by accident. **Increases your efficiency:** Very strong LED lamp – two light intensities to adjust to light conditions as required. Includes laser and UV light.

Tested according to DIN 57680-6, GS, CE compliant.

INFOBOX:
Single pole voltage tester, 12 - 1,000 V AC

- Rapid voltage test thanks to contactless measuring.
- Internationally adjustable measuring tip for all outlets, globally applicable.
- Green illuminated LED indicates readiness.
- Complies with safety standards EN 61010-1 / IEC 61326 and measuring category CAT IV 1,000 VAC.
- Extensive voltage range from 12 - 1,000 V AC.
- The strength of the alternating electrical field is signalled by an acoustic and five-level LED scale.
- Integrated high-luminescence LED flashlight.

INFOBOX:
Single pole voltage tester, 90 - 1,000 V AC

- Rapid voltage test thanks to contactless measuring.
- Internationally adjustable measuring tip for all outlets, globally applicable.
- Green illuminated LED indicates readiness.
- Complies with safety standards EN 61010-1 / IEC 61326 and measuring category CAT IV 1,000 VAC.
- Voltage range from 90 - 1,000 V AC.
- The voltage is visually indicated by an illuminated LED.

Electrician's spirit level

Simplifies your work: Comfortable measurement in different work positions thanks to the ingeniously positioned scales, even when viewed from above. **Saves space:** Perfectly portable; fits into Wiha cases. **Saves time:** Variable distance marks for up to 4 flush boxes. **Increases your efficiency:** Both bubbles can be seen easily even from an acute angle.

Increases your efficiency

Electrician's hammer offers perfect balance thanks to optimum weight distribution for effective handling.

Saves time

Dowel racket allows you to make dowel holes with the strike of a hammer anywhere at any time, even near power sockets.

Increases your work quality

The flat surface on the hammer handle ensures cables and dowels are fitted into position without causing any damage.

Striking

Optimum power transmission.

Specially tailored for use by electricians: Wiha impact tools. With optimally uniform weight distribution, the Wiha electric hammer strikes a perfect balance and is also eminently suitable for use in confined working environments. Its flat claws allow you to remove nails and nail clamps easily. The flat surface on the hammer handle ensures cables and dowels are fitted into position without causing any damage to the cable duct or plasterboard. Wiha's scaled impact screwdriver blade ensures that the portable dowel ratchet makes a perfectly dimensioned dowel hole to the required depth anywhere at any time and without making a mess, unlike power tools. The galvanic separation between the blade and solid steel cap ensures that the user is always protected, even if they accidentally hit a live wire.

"Fits nicely into the hand and can be used in a variety of ways. It's now a permanent fixture in my toolbox!"

Andreas Ebener

Thanks to its optimum balance, the electrician's hammer is perfectly sized in the hand while also providing a secure hold when hammering thanks to the ergonomically shaped hammer handle. With its U-shaped impact surface, the Wiha electrician's hammer delivers the optimum solution to working in corners and confined spaces. You can quickly and easily remove nails and nail clamps from walls with the flat claws on the hammer head. The flat surface on the hammer handle means cables and dowels are positioned effectively without causing any damage to the wall.

- **Simplifies your work**
Flat claws allow you to remove nails and nail clamps easily.
- **Increases your efficiency**
Perfect balance thanks to optimum weight distribution for effective handling.
- **Improved access**
Perfectly suited for use in confined working environments thanks to the combination of a square and round head shape.
- **Increases your work quality**
The flat surface on the hammer handle ensures cables and dowels are fitted into position without causing any damage.

SoftFinish® dowel racket set with dowels

Simplifies your work: Dirt- and dust-free work compared to when machines are used. **Increases your safety:** Galvanic separation in the handle prevents a discharge between the striking cap and the blade. **Protect your health:** Dowel hole can be made anywhere using a hammer at any time, even near power sockets. **Saves time:** Hammer dowel holes anywhere at any time without worrying how near you are to wall sockets. **Increases your efficiency:** Scaled impact screwdriver blade provides more detailed depth measurement. Perfectly dimensioned dowel hole thanks to blade adjusted to required size.

with 6 mm round blade in blister pack, 5-pcs.

INFOBOX: SoftFinish® dowel racket set with dowels

- Makes it easier to insert dowels and saves valuable working time.
- Ensures dirt- and dust-free work compared to machines.
- Galvanic separation between the blade and solid steel cap protects against electric shock.
- Perfect for portable use since you can make dowel holes anywhere at any time at the strike of a hammer.

INFOBOX: Electrician's hammer

- With its optimally uniform weight distribution, this hammer ensures perfect balance, delivering impact and fatigue-free work.
- Its flat claws make it easier to remove fastening components such as nail clamps, even from difficult-to-access spots.
- Optimum access into corners and confined spaces thanks to U-shaped striking surface.
- The flat hammer handle lower surface acts as a soft-faced hammer, ensuring components such as cables and dowels are fixed into position without causing damage.

Protective measures

The following equipment is required for all work on or around live components and should be appropriate for the specific task

- insulating personal protective equipment
- insulating safety mechanisms
- insulated tools

Before starting work, you must disconnect all active, live components of electrical machines and equipment and ensure that they remain disconnected while you carry out the work.

This is achieved by complying with the five safety rules:

- disconnect
- secure against reconnection
- ensure power is switched off
- earth and short-circuit
- cover or block off adjacent live components
