RS PRO Pull Handle, Stainless Steel Material

RS Stock No.: 894-6856

RS Professionally Approved Products bring to you professional quality parts across all product categories. Our product range has been tested by engineers and provides a comparable quality to the leading brands without paying a premium price.

Product Description

Stainless steel has a high resistance to corrosion making these pull handles durable and easy to maintain. Due to their resistance to water and cleaning products they are favoured more than other metal handles which makes them ideally for commercial and residential applications and are often found in kitchens and bathrooms. Pull door handles are a great option for your door furniture as these door handles improve the look of the door and allows it to be fixed to a door without the need for any locking mechanisms to be installed. RS PRO have a range of door handles including lever and pull for internal doors and external doors.
