### Single Sided Copper

Ideal for development and prototyping work, Veroboard is designed primarily for hard wiring of discrete components, typically in analogue circuits, but is equally useful where a number of common bus or signal lines are required.

Veroboard is manufactured from copper clad laminated board which has been pierced with a grid of holes and machined to provide parallel tracks.

**ENGLISH****Features:**

Ideal for hard wiring or discrete components Range of standard sizes

Choice of hole sizes and grid pitch

**Single sided copper**

A variant of Veroboard designed to provide a simple and inexpensive mounting board for discrete components or integrated circuits. The board is suitable for all applications where a conventional tag strip or group board might be used.

**Features:**

Ideal for hard wiring of discrete components Central track break already provided
