TRIAL . ORGANIC . ABSORBENT

Envirosorb is made from 100% biodegradable natural wood fibre. Lightweight yet highly absorbent, it provides fast and reliable spill control across industrial, commercial, and agricultural sectors. Envirosorb quickly captures and contains liquids, leaving surfaces clean, dry, and safe. By supporting sustainability and aiding in responsible waste management, Envirosorb offers an eco-friendly alternative to synthetic absorbents without compromising on performance.

WHERE TO USE IT:

- Warehouses
- Service stations
- Manufacturing plants
- Construction sites
- Mining industry
- Environmental cleanups
- Sewage and wastewater treatment plants

INDUSTRIAL

ABSORBENT

ORGANIC

OILS

FUELS

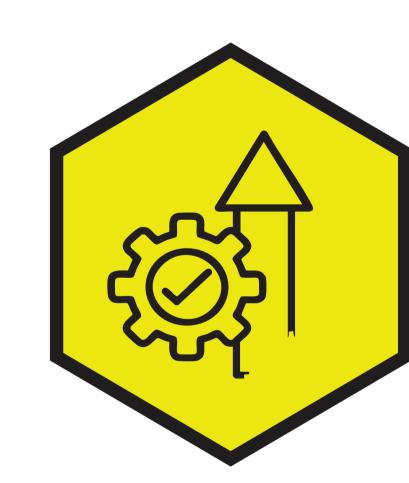

PAINT & SOLVENTS

LIQUID FERLITISERS

INSTRUCTIONS FOR USE:

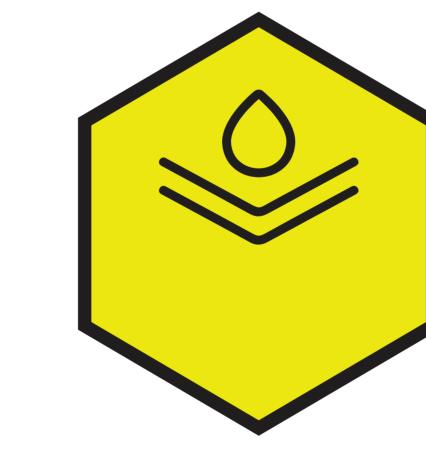

- Apply enough Envirosorb to fully cover the spill.
- STEP 2 Sweep back and forth with a stiff broom until the liquid is completely absorbed.
- Collect the used sorbent with a dustpan. STEP 3
- Dispose of the material responsibly, in accordance with local regulations.

PRODUCT FEATURES:

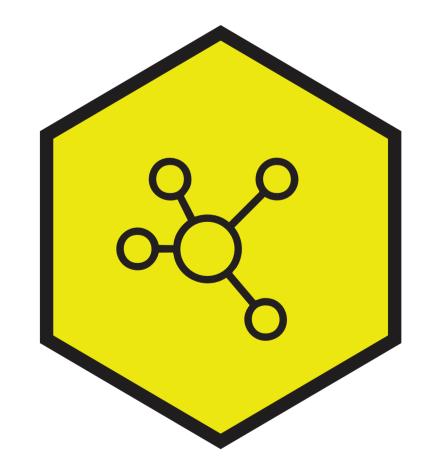

MATERIAL

100% natural pine timber

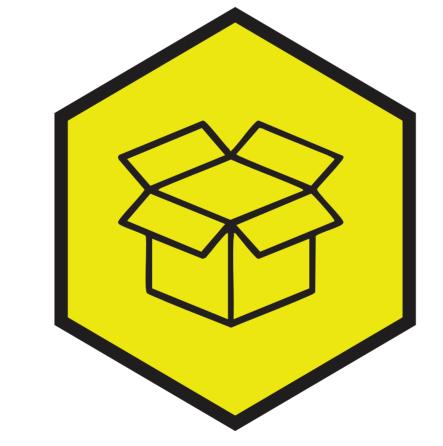

ABSORBENCY

Approx. I0L of water per kg (based on internal testing)

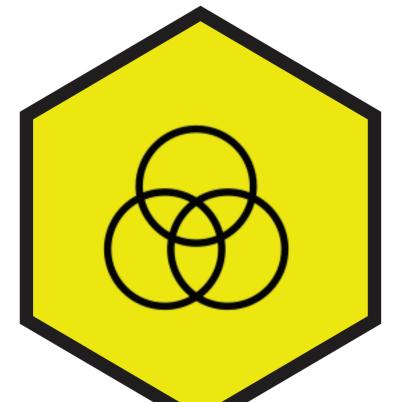

PARTICLE SIZE

≤ 595 microns (sieved)

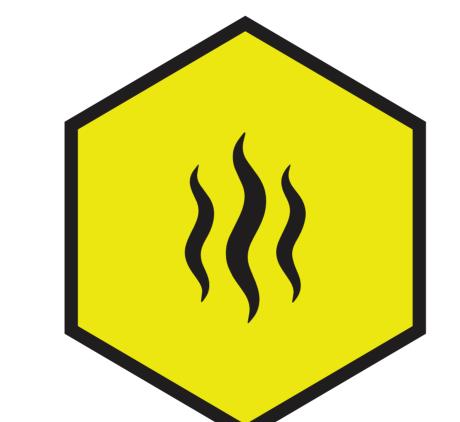

PACKAGING

Kraft paper bags – 5kg net weight (alternative specs available on request)

APPEARANCE

Light tan to beige powder

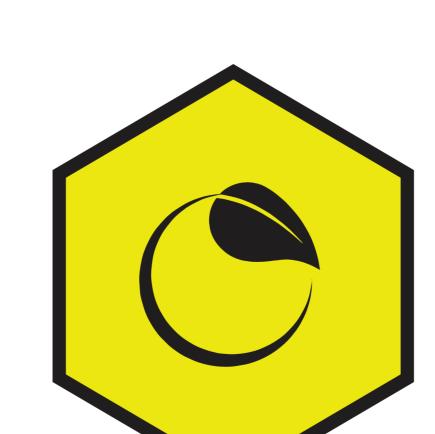

ODOUR

Mild, woody scent

SHELF LIFE

Indefinite if stored in a dry, cool environment

BIODEGRADABILITY

Naturally biodegradable

APPLICATIONS

Liquid spill absorption, industrial clean-up, environmental containment

ULTRA FINE

SPILL ABSORBENT

BIODEGRADABLE
