RS Pro Stainless Steel Adjustable Compression Latch

RS Stock No: 136-3616

- Adjustable grip range between 13 and 72mm using one of three cams. Cranked cam 1: 13-24mm (61-72mm with cam reversed). Cranked cam 2: 25-36mm (49-60mm with cam reversed). Flat cam: 37-48mm.
- Stainless steel AISI304 construction throughout.
- 8mm triangle key operation with locked indicator on the latch head. Use RS key 341-0179.
- Rotating the key by 180° clockwise to lock closes the latch by 90° giving a pull up of 5.5mm to provide excellent gasket sealing. To unlock rotate the key by 180° anti-clockwise and push down on the key.
- IP65 sealed.
- Vibration resistance in the locked position is provided by a cross pin in the shaft that locates in a cut out in the housing.
- Maximum panel thickness of door - 20mm. There is no minimum thickness.
- Left hand, right hand, 12 o'clock, and 6 o'clock locking positions provided for.
- External size on door: 28mm diameter x 5mm deep.
- Installation cut out in the door: 22.2 dia. x 20.2mm.
- Weight: 0.186 Kg.
