

Datasheet

RS PRO USB C to DisplayPort MST Adapter

Stock number: 2368996

EN

The RS PRO USB C DisplayPort MST adapter allows you to connect two DisplayPort monitors to a source with a USB C port. MST functionality allows the two screens to act independently of each other in extend mode, this adapter also supports mirror mode.

MST adapters are more suitable for laptops and computers that have limited ports such as 1 USB C port. This adapter allows you to connect two computer screens with 4k@60Hz to your Laptop/computer. When using just one port on the adapter you can achieve 8k@30Hz.

For full functionality, the source must have a USBC DP Alt mode v1.4.
