Sizing Guide

This is to be used as a guide only. It is recommended that Steel Blue boots are fitted by a Steel Blue Distributor to ensure correct fit and fit-for-purpose. Please refer to Steel Blue's Comfort Guarantee and Manufacturer's Warranty for further information.

How to get the **right fit.**

First, don't measure your feet in the morning; feet often swell during the day due to heat and activity. For the best fit, measure your feet at the end of the day.

To measure your shoe size follow these instructions:

1. HEEL-TOE LENGTH

Place a piece of paper on a hard flat surface/floor with one end against a wall. Put on the socks you will be wearing with your work boots daily before measuring. Stand on the piece of paper with your heel against the wall. Mark the piece of paper where your longest toe/s end with a pencil.

Measure from the end of the piece of paper to the mark you created with your pencil and compare the measurement to our sizing chart.

If a large enough piece of paper isn't available to measure as above, please use a measuring tape and follow the same instructions.

2. CHOOSE THE RIGHT SIZE

If you are in between two sizes, it's recommended to go for the size up, versus the size down. For extra width, choose a half size (if available).

9	7	9	41	256
10	8	10	42	264
11	9	11	43	273

True Ladies Fit

Our ladies safety boots are designed just for women and include a shorter ankle-length and smaller instep.

Most industrial footwear is made for men, with women wearing smaller versions of men's ranges, but in fact women's feet are anatomically different and not just a scaled down version.

Steel Blue is one of the leading safety footwear brands that is specifically tailored to complement the shape of ladies' feet with a true ladies last.
