

Double-coated adhesive tape with easy removal and strong adhesive properties

# No.5000NS

### **Outline**

Nitto No.5000NS is a double-coated adhesive tape consisting of a strong, flexible non-woven fabric impregnated with acrylic adhesive that is applicable to a wide variety of substrates. No. 5000NS offers high tensile strength so it doesn't tear when peeled and leaves minimal adhesive residue on the substrate to which it was applied even if it remains applied for a long time. The tape can be re-peeled and is ideally suited for applications that require recycling.

### **Structure**

Double release liner type, "No.5000NSWH" is also available.

### **Features**

- Tape is strong so it doesn't tear when peeled, thereby making it easier to work with.
- Leaves minimal adhesive residue; can be re-peeled.
- Offers wide range of usage and service temperatures as well as superior repulsion properties.
- 10 restricted substances by RoHS are not contained.
- No.5000NS, No.5000NSU & No.5000NSWH are UL approved products. [UL File No. MH13557]
   [The appearance and properties of both No.5000NSU and No.5000NS are identical.]

## **Applications**

- Bonding of metal plates, plastic plates and foam
- Bonding of cushioning and sealing materials in:
   Printers, Copiers, Televisions, Other office equipment and home appliances.
- Applications requiring re-peeling

#### Sizes

Tape thickness (mm)	Width (mm)	Length (M)
0.16	3-1, 200	50

For details contact the department in charge of the product in question.

No.5000NS 10-P-0012 E(1/7)

<sup>\* &</sup>quot;Non-woven fabric" is classified under a law called Customs Act of Fixed Rate Chapter 48 "Paper and paperboard; articles of paper pulp, of paper or of paperboard".

## **Properties**

### Re-peeling properties

	No.500		Conventional product	
Substrate	Peeling properties	Adhesive residue	Peeling properties	Adhesive residue
Stainless steel plate	0	0	×	×

PET plate	0	0	×	×
Glass plate	0	0	×	×

### Peeling properties

O: Peels without tearing

x: Tears when peeled

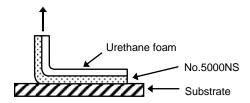

### [Peeling properties test method]

Lining material: 5-mm thick urethane foam

Tape width: 3 mm

Curing condition: 60degreeC/90%RH x 15 days

Peeling speed: 300 mm/min Peeling angle: 90 degree

### Adhesive residue

O: No adhesive residue

△: Some adhesive residue

×: Large amount of adhesive residue

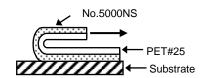

### [Adhesive residue test method]

Tape area: 20 mm

Lining material: PET #25

Curing condition: 60degreeC/90%RH x 15 days

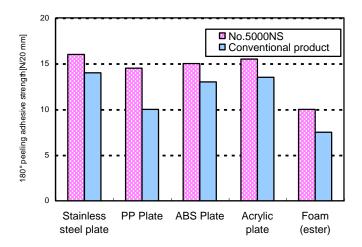

Peeling speed: 300 mm/min Peeling angle: 180 degree

180 degree peeling adhesive strength for each substrate

No.5000NS 10-P-0012\_E(2/7)

(Unit: N/20mm) Sample width: 20 mm Backing material: PET#25 Application condition:

1 pass back and forth with a 2kg roller Bonding temperature: 23degreeC/50%RH Curing condition: 23degreeC/50%RH x 30 min

Peeling speed: 300 mm/min Peeling angle: 180degree

Peeling speed: 50 mm/min

Measurement temperature: 23degreeC/50%RH

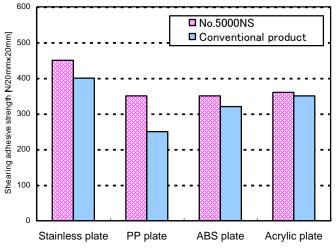

Substrate	No.5000NS	Conventional product

## Precautions when using

- Remove all oil, moisture and dirt from the surface of the substrate before applying.
- Since the tape is pressure-sensitive adhesive, be sure to apply enough pressure with a roller or press when applying. Otherwise it might be affected to its properties and appearance.
- ●The tape may not adhere well to extremely uneven or distorted surfaces. Enough Leveling off the surface should be required before applying.
- It takes certain time to get full adhesive strength after applying, keep away the tape from any stress for a several hours after applying.

## **Precautions when storing**

- Please be sure to keep the tape in its box when not using.
- Please keep in a cool and dark place away from direct sunlight.

Safety precautions

- Make sure the product is suitable for the application (objective and conditions) before attempting to use. The tape may come off depending on the substrate to which it is applied or conditions under which it is applied.
- •Use in combination with another method of joining if there is possibility of an accident.
