Stock No. 161-7288

RS PRO Ammeter retrofit module for PDU

- Voltage
- Current
- Power
- Energy consumption

Bell Off

Bell On

Long press Button to set Bell On/Off

If you set Bell on, when current is over 32 A, bell will ring

SPECIFICATIONS:

Input

Rating voltage: 250 V ac 50/60 Hz

Display

Operation state: 1 LED indicator

Load current:

1. Full scale: 32 A

2. Accuracy: +/-1%+1 Digit

3. Resolution: 100 mA

4. Response time: 400 ms

Input voltage

1. Full scale: 255 V

2. Accuracy:+/-1%+3 Digit

3. Resolution: 1 V

4. Response time: 400 ms

Controlling Button

BUTTON: Switch over display information

Module outlook

Dimension: L x W x H = 140 x 42 x 57 mm

Color: Black

Working environment

Operating Temperature**:** 0 - 50°C,

Relative humidity: 0 - 95%

Applications:

It is widely applied to the data centers of industries like network communication, telecom, electric power,

finance, insurance, aerospace, transportation, information processing, education, medical, E-government etc.
