## RS PRO 3.5 mm Cable Mount Stereo Jack Socket

RS Stock No.:392-615

RS Professionally Approved Products bring to you professional quality parts across all product categories. Our product range has been tested by engineers and provides a comparable quality to the leading brands without paying a premium price.

### Product Description

From RS PRO, this cable mounted in-line Jack socket is designed to accommodate 3.5mm jack plugs. Being cable mounted, it is ideal for jack lead extensions for connections longer than a conventional jack lead can provide. With a nickel-plated contact, this cable mount stereo jack is not only cost-effective, but ensures a quality audio connection. The mini jack connector socket has solder tabs for connecting to an appropriate cable. It features a metal screw on cable sleeve with an ergonomic grip design to ensure the connection is well protected. The jack socket also features an integrated strain relief that prevents damage to the connector caused by tugging or pulling on the attached cable
