RS PRO Padlockable Door Bolt

RS Stock No: 2549971

RS Professionally Approved Products bring to you professional quality parts across all product categories. Our product range has been tested by engineers and provides a comparable quality to the leading brands without paying a premium price.

Product Description

Secure your premises with this heavy-duty door bolt from RS PRO. You can attach a padlock for a simple yet sturdy locking solution that's tough to break. It will accept padlocks with a shackle up to half an inch in diameter.

The sturdy Brenton bolt is made from galvanised steel for outstanding resistance to mechanical damage and a long service life. It's suitable for surface mounting in either a horizontal or a vertical position using the eight fixing holes provided. The shoot diameter is 16mm (5/8"). It comes complete with a strike plate.

Bolts of this kind are commonly used on gates and doors for securing industrial premises such as warehouses, builder's yards and garages. A secure locking system is vital for keeping out thieves, trespassers and vandals, and a very small investment could save your business substantial financial losses.
