

Eye Protection

INTRODUCTION

Welcome to our eye protection selection guide.

This guide helps you select the most appropriate protective eyewear for you and your business.

The guide includes a details of the risk types you may be subject to. It gives an overview of lens and frame markings and covers the European safety standards to be aware of when choosing. Selection tables provide all of the information you need to make a buying decision.

WHY BUY FROM RS?

As industry experts we offer a wide range of protective eyewear for many environments and risk types. We stock professionally-approved RS products and many from market leading brands. This means you can find all the products you need from one source, with next day delivery, competitive pricing and bulk discounts.

LENS MATERIALS

Polycarbonate lenses provide the highest impact level tested under EN166.

Acetate and CR39 lenses still give general impact protection but are geared more for longer duration against liquid and chemical splash situations.

Ventilated versions give an **extra aeration** to the anti-fog lens but still conform to the liquid and chemical splash requirements.

Non Ventilated (or sealed) also conform to the liquid and chemical splash requirements but in addition provide dust protection conformity.

WHAT TYPE OF PROTECTION SHOULD YOU CHOOSE?

Protecting yourself from MECHANICAL risks

Grinding work, particle projections, projections of metal filings or debris from tools.

Risks or Use	Symbol*	Safety Spectacles	Safety Goggles	Standard
Low energy impact 45 m/s	F			EN166
Medium energy impact 120 m/s	B	-		EN166
High energy impact 190 m/s	A	-	-	EN166

The F, B or A symbol must be indicated on the lens and the frame to guarantee protection from mechanical risks. If the symbols differ, the symbol representing the lowest resistance is applied to the protection as a whole.

Protecting yourself from ELECTRIC risks

Protection from live contact and short circuit electric arcs.

Risks or Use	Symbol*	Safety Spectacles	Safety Goggles	Standard
Short-circuit electric arc	8	-	-	EN166

The 8 symbol must be indicated on the lens and the frame to guarantee protection from electrical risks.

Protecting yourself from THERMAL risks

Sprays of hot liquids or solids, intense heat radiation, radiating heat from furnaces.

Risks or Use	Symbol*	Safety Spectacles	Safety Goggles	Standard
Spray of molten metals and hot solids	9	-		EN166

The 9 symbol must be indicated on the lens and the frame to guarantee protection from thermal risks.

Protecting yourself from RADIATION risks

Exposure of the eyes to high intensity, ultra violet, infra-red and visible light sources, welding activities, steelworks, surgery.

Risks or Use	Symbol*	Safety Spectacles	Safety Goggles	Standard
Ultraviolet radiation	2			EN166 EN170
Infra-red radiation	4			EN166 EN171
Solar radiation for industrial use	5 or 6			EN166 EN172
Electric welding	EN175 for the hood EN379 for the filter	-	-	EN166-169 EN175 EN379
Gas welding	1.7/3/5			EN166 EN169
Laser radiation	R1 to R5 LB1 to LB10			EN207 EN208

The standard is identified on the lens markings.

Protecting yourself from CHEMICAL risks

Protection from toxic dust, aerosols, dangerous liquids, gas or toxic vapours.

Risks or Use	Symbol*	Safety Spectacles	Safety Goggles	Standard
Liquid droplets	3	-		EN166
Liquid splashes	3	-		EN166
Large dust particles > 5 microns	4	-		EN166
Gas and fine dust particles < 5 microns	5	-		EN166

The 3, 4 and 5 symbol or symbols must be indicated on the frame. If none of these symbols is indicated in the markings, then the equipment is not suitable for chemical risks.

MANDATORY MARKINGS

Lens and frame marking is specific to each product

Each marking corresponds to a very specific use. Certified by independent laboratories, this information guarantees protective eyewear quality and resistance.

EN Standard
EN166 FT CE

Manufacturer logo

Lens technology

European standard
2C-1.2 1 FT CE

Code (field of use)
2 or 3: UV filter (EN170)
4: IR filter (EN171)
5 or 6: solar filter (EN172)

Protection class
1.2 to 6: degree of visible light filtration

Mechanical strength
Mandatory marking on frame and lens
S Extra strong, resists a 22 mm 43 g ball falling 1.30 m at 5.1 m/s.
F Low energy impact, resists a 6 mm, 0.86 g ball at 45 m/s.
B Medium energy impact, resists a 6 mm, 0.86 g ball at 120 m/s.
A High energy impact, resists a 6 mm, 0.86 g ball at 190 m/s.
T The letter T, immediately after the mechanical strength symbol, authorises use in an environment in which high speed particles at extreme temperatures are present.
Marking on the lenses only
K Resistance to surface damage by fine particles (optional).
N Resistance to fogging (optional).

Colour perception
C: unimpaired colour perception

Crown
Manufacturer identification
Bollé Safety

Optical class
1: high optical quality
No optical distortion (suitable for permanent wear)

bolle SAFETY

EUROPEAN STANDARDS

Basic Standards

- EN166** Guarantee of minimum protection against everyday risks (dropping, sun-ageing, heat exposure, corrosion, etc.)
EN167 Optical test methods.
EN168 Test methods other than optical.

Standards by type of application

Identified by a code (field of use) which is on the lens marking.

- EN169** Welding filters.
EN170 Ultra-violet filters (code 2 or 3).
EN171 Infra-red filters (code 4).
EN172 Industrial use solar protection filters (code 5 or 6).
EN175 Equipment for welding (presence of the EN175 on the product).
EN207 Laser protection glasses (code LB1 to LB10).
EN208 Laser adjustment glasses (code R1 to R5).
EN379 Specification covering welding filters

Frame Marking

The frame must include:

- CE symbol • Manufacturer • Use & strength symbols
- EN standard (if applicable)

Symbols explained:

Only on the frame (chemical protection)

- 3** Liquid droplets or splashes.
4 Large dust particles > 5 microns.
5 Gas and fine dust particles < 5 microns.

Mandatory marking on frame and lens

- 8** Electrical short circuit arc.
9 Molten metal and hot solids.

Lens Markings

Lens marking must include:

- The scale number for filtering lenses (code).
- The manufacturer's name (logo or brand recommended by the manufacturer).

Symbols explained:

- 1** Continuous work - Worn permanently
2 Non-continuous work - Worn intermittently
3 Occasional work, must not be worn permanently.
8 Electrical short circuit arc.
9 Molten metal and hot solids.

WARNING

- F.** Maximum protection for glasses
B. Maximum protection for goggles
A. Maximum protection for face shields

If the S, F, B, A and T symbols do not apply to both the lens and frame, then the lowest level must be assigned to the complete protective eyewear

WHY USE OVER SPECTACLES?

Overspectacles are designed to fit over most users' prescription spectacles with minimal interference.

They offer an excellent coverage and field of vision, combined with a high level of protection against impacts.

NEW

Your style. Your choice.

Protective eyewear the way you need it
with the new SecureFit™ 600.

3M™ SecureFit™ 600 Series Protective Eyewear combine the best features of existing models, and add more. They are designed for maximum comfort, fit and clarity, so they stay on and wearers stay protected. A host of options means that there is the right version for any situation – lens colour choices, anti-scratch or 3M™ Scotchgard™ Anti-Fog coating, Pressure Diffusion Temple (PDT) technology for security and comfort, foam gasket, and more.

Applied to Life.™

3M Welding Protection

3M™ Speedglas™ 9100 FX Welding Shield

Introducing a flipup combination of an auto-darkening welding shield and a protective visor. Not only is the viewing area larger compared to previous models, we totally redesigned the geometry of the shield for a wider field of view in all directions.

3M™ SecureFit™ 600 Series Safety Spectacles

Designed for maximum comfort, fit and clarity the 3M™ Pressure Diffusion Temple Technology regulates the amount of force on individual head sizes to ensure the optimum pressure for a secure and comfortable fit. Available in welding shades 1.7, 3.0 and 5.0.

3M™ Welding Safety Goggles 2895S Shade 5.0 IR

The 2895S Safety Goggle features a modern, slim design and are assessed against the EN169:2002 transmittance requirements for welding filters. This product protects against high speed impact at medium energy at room temperature only.

 **Speedglas™**

Cleaning Stations & Kits

1 RS Pro Lens Cleaning Station

This cleaning station gives you instant access to low lint and non-abrasive tissues that are excellent to use on plastic, glass and polycarbonate lenses.

2 3M Lens Cleaning Station

The Super-Clear lens cleaning station from AOSafety provides 400 cleaning tissues and a 120ml bottle of Super-Clear lens cleaning solution.

3 Bollé Anti-Fog Lens Cleaning Kit

Guarantee perfect cleaning for glasses and goggles with the B-Clean anti-fog lens cleaning kit from Bollé Safety.

- 30ml anti-fog solution
- Microfibre cloth

4 UVEX Lens Cleaning Station

Store lens cleaning fluid and tissues at one convenient point with UVEX. This storage unit contains absorbent tissues and cleaning fluid for use with anti-fogging and scratch-resistant lenses.

Tissues, Wipes & Cloths

1 RS Pro Lens Cleaning Towelette Pack

Supplied in a sturdy cardboard package with easy dispensing, RS Pro lens cleaning towelettes are safe and effective for use on various lens coatings. Towelettes are anti-static, anti-fog and are individually wrapped.

2 AF Products Safety Glasses Cleaning Wipes

NEW AF safety glasses cleaner is a handy pack of 50 individual impregnated wipes for cleaning personal protective/safety glasses equipment.

3 Bollé B Clean Lens Cleaning Tissues

Alcohol and silicone free cleaning tissues supplied in a handy dispenser.

4 Bollé B Clean Lens Cleaning Wipes

B Clean lens cleaning wipes are multi-function dry cleaning wipes, alcohol and silicone free. The water-based formula of the tissues is suitable for all types of lenses.

5 Bollé Lens Cleaning Cloth

A soft, non-linting and reusable cloth suitable for all lens types.

6 UVEX Lens Cleaning Tissues

UVEX lens cleaning tissues are low lint tissues that are non-abrasive, absorbent and environmentally friendly. Tissues are designed to maintain lens coatings in the best condition.

7 UVEX Lens Cleaning Towelettes

UVEX lens cleaning towelettes are supplied in sealed individually wrapped packets and are easy to use on the go or keep in your pocket. The towelettes are silicon free and when opened are moist ensuring thorough cleaning of all types of lenses.

Storage and Dispensing

1 RS Pro Eyewear Storage Box

- Top opening prevents dust and dirt from entering the box
- Simple to fix to wall (screws included)
- Transparent lid

2 Bollé Protective Eyewear Dispenser

- Meets Directive 89/686/EEC for protective eyewear
- Robust construction
- Provides care during storage
- Scratch resistant lining

3 3M Wall Mounted Dispenser

- Max stacking height: 50cm
- Loading & retrieval aperture: 16 x 6cm
