Titanium Alloy, Hexagon Cap Socket Screws: Metric Thread

Socket caps have a small cylindrical head with tall vertical sides giving them space-saving advantages, as well as greater tensile strength and requiring less side room for wrenches. These socket screws are used in many applications including the manufacture and repair of vehicles, machine tooling, tools and dies, machine production and repair and general engineering applications. Most importantly, socket head cap screws provide safety, reliability and cost efficiency. These Titanium screws are non-toxic and offer very high corrosion resistance. Although Titanium fasteners are more expensive than steel and stainless steel, Titanium screws will not rust and are ideal for many construction builds.

- Threaded in accordance with DIN 912 Standard
- High Tensile Titanium Alloy
- Used for applications with limited space in high tensile applications
- Suitable for use in many industrial applications and similarly medical, construction, electronic & domestic applications.
- Requires a Hex key / Allen key
