

Pump Dispenser WPS 1500

Ecological | economical

WPS 1500; refillable pump dispenser. The building-up pressure in the fluid container is achieved by pumping pure air with the pump rod. An integrated security valve opens automatically as soon as the allowed pressure (max. 4 bar) has been exceeded. Pushing the spray lever provides an even and constant fluid emission. By turning the spray adjustment dial, the spray rate and spray pattern can be adjusted from a strong jet to a light spray mist.
