

## Acision RHT6200 Thermo hygrometer

The Acision RHT6200 Thermo-Hygrometer measures both temperature and humidity in the air using two integrated sensors — a thermometer for temperature and a hygrometer for humidity.

Thermo-hygrometers are widely used in homes, industries, laboratories, and agriculture to maintain ideal environmental conditions. They play a key role in ensuring human comfort, preserving sensitive materials, and monitoring ambient conditions for specific applications — such as maintaining suitable environments for plant growth or controlling humidity levels in manufacturing processes.

### Feature

- Large LCD Display
- Displays temperature humidity
- Max & Min Temperature / Humidity memories
- °C & °F temperature display switch
- Calendar function, hour beep function, alarm Clock

Comes with: Battery & Instruction manual

Warranty: 1 year against manufacturing defects

### Specification

Size	108 * 98 * 21 mm
Weight:	107g
Temperature Range:	0 °C to 50 °C (32 °F to 122 °F)
Humidity Range:	10% to 98%
Analyze degree:	0.1 °C, 1%RH
Accurate Precision:	±1 °C, ±5%RH
Power Supply:	AAA Battery (1 piece)
