

## FALCON FIRE BLANKET

### DESCRIPTION

A **fire blanket** is a safety device designed to extinguish small incipient (starting) fires. It consists of a sheet of fire retardant material which is laced over a fire in order to smother it

Small fire blankets, such as for use in kitchens and around the home, are usually made of fiberglass and sometimes Kevlar, and are folded into a quick-release contraption for ease of storage.

Fire blankets, along with fire extinguishers, are fire safety items that can be useful in case of a fire. These non-flammable blankets are helpful in temperatures up to 900 degrees and are useful in smothering small fires by not allowing any oxygen to the fire. Due to its simplicity, a fire blanket may be more helpful for someone who is inexperienced with fire extinguishers.

### AVAILABLE IN DIFFERENT SIZES

Made of woven fibreglass fabric that meets standard EN 1869:1997

#### 1.2m x 1.2m (Blanket Size)

Length of casing: 20.3cm

Width of casing: 17.6cm

Depth of casing: 4.3cm

Weight: 1.2 KG

#### 1.2m x 1.8m (Blanket Size)

Length of casing: 26cm

Width of casing: 17.6cm

Depth of casing: 4.3cm

Weight: 1.6KG

#### 1.8m x 1.8m (Blanket Size)

Length of casing: 33.3cm

Width of casing: 17.6cm

Depth of casing: 4.3cm

Weight: 2.0 KG
