RS PRO Fully Bonded Bushes

The RS PRO Fully Bonded Bush consists of 2 concentric sleeves with rubber securely bonded between them. They are designed to be used as vibration isolators for both static and mobile equipment.

Features:

- Designed to withstand axial and radial loads as well as torsional movements.
- Rubber is pre-stressed to give maximum dynamic strength and durability
- No lubrication or other bearing maintenance is required
- Bonded rubber controls the equipment movement in all directions.

Applications:

- Car and truck engines
- Alternators
- Vehicle Suspension Leaf Springs
- Generators

F = Inside Diameter
 D = Outside Diameter
 L1 = Outside Length
 L2 = Inside Diameter
