

FEATURES

- Plain washer
- Outer diameter of 30 mm
- Inner diameter of 10.5 mm
- Thickness of 2.5 mm
- For use with M10 screws and bolts
- A2 304 stainless steel construction for durability and corrosion resistance
- Complies with RoHS (restriction of hazardous substances) standards
- DIN 9021 compliant

Stainless Steel Plain Washer, 2.5mm Thickness, M10, A2 304

RS Stock No.: 797-6254

RS Professionally Approved Products bring to you professional quality parts across all product categories. Our product range has been tested by engineers and provides a comparable quality to the leading brands without paying a premium price.

Product Description

These stainless steel plain washers from the RS PRO range are made from stainless steel that's high-grade A2 304. This means they're both robust and corrosion-resistant, so they're suitable for use in food, chemical and electronic settings. Stainless steel washers can also prevent galvanic corrosion by insulating steel fasteners from aluminium surfaces. They can prevent wear and tear due to friction by reducing distortion of mating surfaces, improving load distribution and eliminating pressure over time. They also help ensure components can be tightened and loosened easily, extending the lifespan of joints.

General Specifications

For Screw/Bolt Size	M10
Material	Stainless Steel
Finish	Plain

Mechanical Specifications

Inside Diameter	30mm
Outside Diameter	10.5mm
Stainless Steel Type	A2 304
Thickness	2.5mm
Specification	DIN 9021

Approvals

Compliance/Certifications	RoHS
