

FEATURES

- Black tapered levers
- Shafts made from zinc-plated steel
- Handles made from phenolic plastic
- Abrasion, corrosion, and heat resistant
- Male M10 thread
- Insert length of 15 mm
- Length of 113 mm
- RoHS compliant

RS PRO Zinc Plated Steel Tapered Handle, M10 x 15mm

RS Stock No.: 702-7566

RS Professionally Approved Products bring to you professional quality parts across all product categories. Our product range has been tested by engineers and provides a comparable quality to the leading brands without paying a premium price.

Product Description

From our reliable RS PRO series, these tapered levers offer a comfortable grip for easy and responsive manipulation. They boast a robust design from premium materials. The handles are made from phenolic plastic, a compound that's exceptionally heat resistant. This also offers protection from oils and greases. Measuring 113 mm, there's ample room to hold onto them. What's more, the shafts are made from high-quality steel for strength and durability and they're zinc plated. This provides resistance to corrosion and high-temperature tolerance. With an operating temperature range of -30 to + 140°C, they're well-suited for use with cooking equipment or in other extreme temperature environments.

General Specifications

Lever Type	Tapered Handle
Thread Gender	Male
Thread Size	M10
Handle Material	Phenolic
Shaft Material	Steel
Insert Material	Zinc Plated Steel
Colour	Black
Applications	Manufacturing and engineering environments, cooking equipment.

Mechanical Specifications

Thread/Insert Length	15mm
Length	113mm

Operation Environment Specifications

Temperature Range	-30°C to 140°C
