RS Pro Noga Aluminium Alloy Center Lock Arm, Centering, with vacuum base

Product Details

Vacuum Base – Indicator Clamp

A vacuum base with a metal contact surface around the circumference of the vacuum pad to ensure firm, solid, movement free clamping. Ideal for use with granite surface tables, or any flat non-ferrous surface. Fitted with a centre lock, fully articulated arm

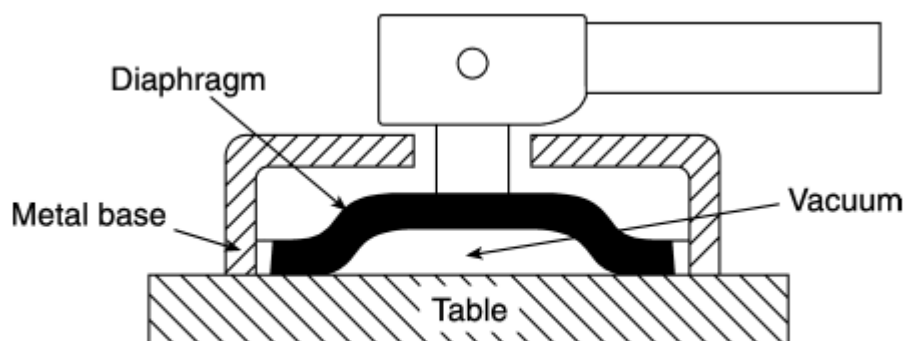

Specifications:

Material	Aluminium Alloy
Centering	Yes
Vacuum Base	Yes
Arm Type	Center Lock

Base	
Vacuum Type	92mm dia. x H.20
	160N clamping force when in contact with a clean flat surface
Stand	
Pillar and Arm	
(L.110)(L.100)	Chrome plated steel incorporates spherical knuckle joints top and bottom with centre lock screw assembly
Fine adjustment	Located at head of stand
Clamp	Will accept dovetail lever gauges or 8mm stem dial indicators

Note

Fine adjustment method varies from base to base. It can be adjacent to the base or instrument clamp.

Contact area, metal base to table

Non-Magnetic Bases & Arms

All Noga bases incorporate a centre lock feature whereby all of the articulated ball joints can be locked simultaneously using one knurled lock. This improves set up accuracy and reduces set up times.
