

Datasheet Stock No: 121-6870 RS Pro Motor Protection Switch

Specifications:

- Versions: MS32 with thermal and magnetic releases
- Manual control: START, STOP, push-buttons with a trip indication (i.e. push-buttons stay in the middle position)
- Automatic switch-off at over-current with thermal or magnetic release
- Control with under-voltage release or shunt release
- An auxiliary switch for side mounting or flush mounting used for indication of the switching state
- Indication of release with trip indicating auxiliary switch
- ON/OFF buttons position unequivocally indicates switching position of main circuit contacts
- Contact material Resistant to contact welding Enables low contact heating
- Isolating distance between contacts: 4.5 mm per contact place
- Connection of a rigid or flexible conductor
- Assembly to 35 mm wide mounting rail in compliance with EN 60715
- Vertical or horizontal operational position

Technical Specification

MSK – Connection Blocks

MSK07, MSKNL6-22 adapters are used for connecting a motor protection switch with a contactor forming a single-unit starter for quick assembly to a 35 mm wide mounting rail (EN 60715).

Accessories

HO-41 and 55 Enclosure

Padlock Feature

b

Emergency Stop Push-Button
