Stainless Steel Latch

RS Stock No.: 124-1912

RS Professionally Approved Products bring to you professional quality parts across all product categories. Our product range has been tested by engineers and provides a comparable quality to the leading brands without paying a premium price.

Product Description

RS PRO adjustable toggle latch which is made from stainless steel. The adjustable latches are an excellent solution when you need a corrosion resistant latch on your food containers or marine equipment. Toggle latches are a type of mechanical fastener and are also known as over centre fasteners, draw latches, and quick release fasteners and offer secure and easy fastening when locked. The unique cam action design makes the toggle latch strong and reliable and the quick release function means it can open quickly. When choosing a toggle latch you need to consider the maximum load to which it will be subject to as each latch and hook has been designed for a maximum load. RS PRO have a great range of toggle latches and door latches to suit large or small-scale applications including high strength latches, lockable, adjustable and non-adjustable options.
