# Anodised Aluminium Heat Sink Case, Black, 165 x 105 x 60.5mm

RS Stock number 2971291

## Features

General purpose enclosure case manufactured from aluminium extrusion with a removable top cover to allow easy access for assembly and installation of components parts. Specifically developed to offer a stylish yet robust off the shelf item within which to mount electronic circuitry and components.

The external surface of the enclosure incorporates a series of ribbed fins to aid heat dissipation, T slots have been provided on both the sides and base of the enclosure providing mounting facilities.

Multi-position PCB slots have been provided inside of the enclosure case and will accept Eurocad size PCB.

The enclosure case is supplied complete with 2 x 1.5mm aluminium end plates, 2.0mm thick aluminium top cover and stainless steel fixing screws.
