

Dissipative Polyethylene Liners

Features:

- Our ESD refuse sacks are made of antistatic polyethylene
- Printed in black with ESD caution logo and text onto polyethylene
- Complies to standards ANSI/ESD S20.20:2007 and BS EN 61340-5-1:2007

Homogeneous, non-amine antistatic polythene film which is effective at low relative humidity (less than 12%)

Specifically designed for the particular need of the electronics industry.

The special additives used do not affect the film clarity or quality, and it is therefore most economical in use, as the standard film thickness can be selected
