RS PRO Metal Empty Control Station with Shroud

RS Stock No.: 136-8581

RS PRO is the own brand of RS. The RS PRO Seal of Approval is your assurance of professional quality, a guarantee that every part is rigorously tested, inspected, and audited against demanding standards. Making RS PRO the Smart Choice for our customers.

Product Description

Searching for a strong and reliable push button housing? You can use this RS PRO enclosure to securely house an emergency stop or start/stop button in harsh and potentially hazardous industrial environments.

It's made from diecast aluminium to ensure it's strong, durable and resistant to corrosion. It has a single-hole body, so self-assembly is a breeze. Its grey body has an intense yellow colour front, so you can be sure it'll be highly visible.

The unit's durability and IP (ingress protection) rating mean that you can use it in environments with a wide temperature range – IP65 protects the unit from dust and low-pressure jets of water. You can see enclosures like this one generally used to shelter push buttons and control stations in a variety of applications, including electrical engineering and warehouses as well as chemical and food industries.

General Specifications

Features	
Height	72mm
Width	72mm
Depth	57mm
Weight	0.29Kg
Colour	Yellow lid on grey base
Enclosure construction	Die cast aluminium
Standard	EN 60947-5-1
Degree of protection	IP65
Operating temperature	-25°C to +70°C
