| Luminous intensity will be reduced with lower operating current. | | | | | | |

Note: The operating voltage must not be exceeded by more that 10% as this will result in reduced life expectancy.

The company reserves the right to change specifications without notice.

* Customer to supply resistor for desired operating current.

Luminous intensity is measured at 20mA on a discrete LED unless otherwise stated.

Luminous intensities and color shades of white LEDs may vary within a batch.

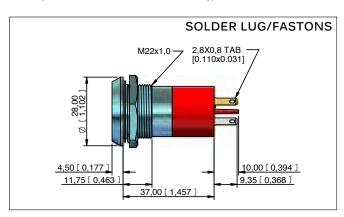

LED characteristics are dependent upon environmental conditions. Therefore published data should be considered nominal.
