RS Stock No: 195-2191

RS Professionally Approved Products bring to you professional quality parts across all product categories. Our product range has been tested by engineers and provides a comparable quality to the leading brands without paying a premium price.

Water Softeners

Product Description

Use this compact medium-sized RS PRO Maxi water softener to improve your washing, bathing and cleaning experience. It will also protect your heating system, plumbing and household appliances.

This water softener is suitable for all types of plumbing systems, so you can be sure it will fit. It requires little programming and allows you to easily adjust the water hardness level you require. The resin material used in this unit traps calcium ions and limescale as water passes through the filter and exchanges them for sodium ions. The ion exchange hard water treatment technology is known for its efficiency, so you can be sure the softener will perform well.

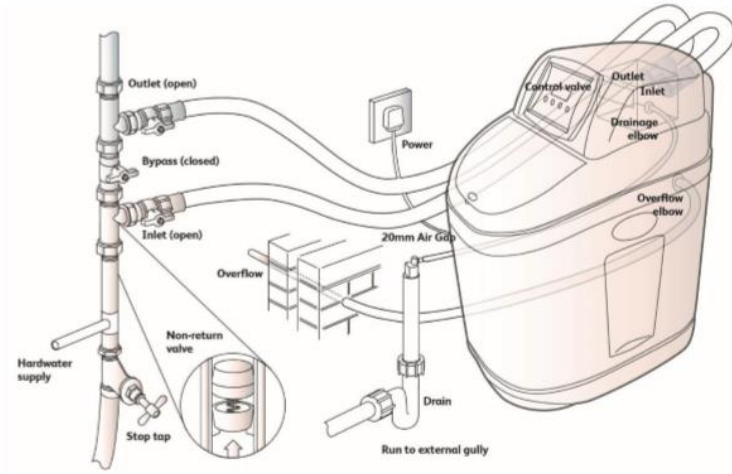

This unit provides a continuous supply of soft water, which ensures your household water appliances are protected against limescale.
