CLEANROOM TOOL BACKPACK SPECS

Item Code	CU206-BP-ESD
Description	ESD Safe Backpack Full Covered w/ PVC
Dimensions	16.5" x 11.8'' x 3.9" (42 x 32 x 12 cm)
Material	PVC w/ shield of carbon printing
Color	Transparent Honeycomb Pattern
Surface Electrical Resistivity	Less than $10+5\Omega$

*The information above is a guideline of typical performance values and characteristics of the products &
not to be use as actual product specification.*

Features	◆ Especially for engineers working in clean rooms, labs, factories, and offices in the electronic and semiconductor industry. Its ESD-safe feature protects sensitive electronic components and devices from being harmed by the buildup and discharge of static. ◆ Electrons flow easily across the surface of the backpack by its carbon printing in honeycomb patterns. ◆ This backpack is fully covered with PVC, including straps and main body, to make cleaning easiest. Its full-covered feature protects the bag from dirt, grime, and any spills. ◆ Transparency is designed for you to easily see through. Clear bags can be used not only in engineers' working environments but can also be applied where transparency is required, such as airport and stadium sporting events for security reason. ◆ Adjustable straps are designed to disperse weight for more carrying comfort. ◆ Spacious storage also adds its value, with one major compartment and the other two in the front, organizing and storing personal items and tools is extremely easy. ◆ Reinforced stitching connections withstand heavy use everyday.
