

# **Datasheet**

## RS PRO 3 Phase AC motor, 7.5kW, 2pole, B5 Flange mounted

Stock number: 187-9888

EN

### Overview

Our Aluminium range of motors are produced in accordance with IEC 60034 standards and manufactured in a modern European factory equipped with latest technologies to guarantee quality.

This range of motors offer an affordable solution for your needs while not compromising on quality. Typical applications include fans, pumps, conveyors, gearboxes and many more.

## **Key Features**

- Frame 63-160
- · Thermistors Fitted as standard
- Located Bearing at NDE
- · Reinforced bearing housing
  - 80-112 DE Only
  - 132 & 160 DE & NDE
- · Oil Seal fitted as standard at both Ends
- RAL7031 rustproof painting 40micron min
- · Inverter rated windings
  - CT = 2:1 VT = 10:1
- NDE Shaft drilled and Tapped for easy mounting of accessories
- Two earthing terminals
- Bearing C3 Shielded
- Bearing make SKF, FAG, NSK, NTN

# **Specifications**

| Weight (KG)                              | 55 kg               | Bearing (NDE)                                     | 6208 ZZC3 SKF |

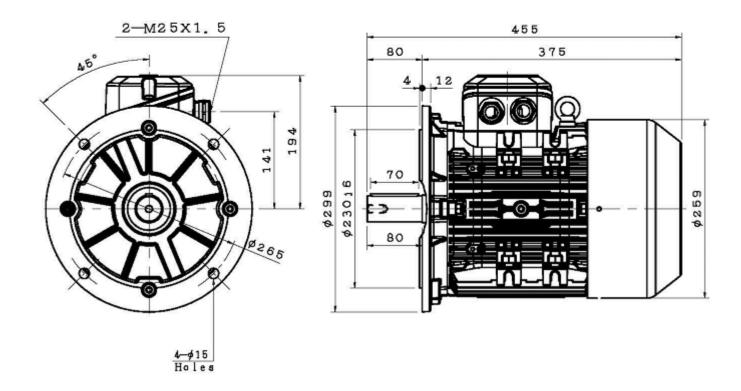

<sup>\*</sup> Efficiencies are calculated according to IEC 60034-2-1 : 2014 standarts indirect method where the additional load losses are determined from exact measurements at different load points.

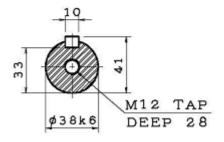

# **Dimensions**

Totally Enclosed Fan-Cooled Vertical Type, Squirrel-Cage Rotor,

#### Note:

- 1. IP55 Protection.
- 2. Aluminum Motor.
