

FEATURES

- Practical board for experimental set ups and prototyping
- 2420 connection points
- 1920 horizontal interconnections
- 500 vertical interconnection
- 24 number of switchable ICs
- Switches can be implemented or changed quickly and easily
- Measures 240 x 194 x 20 mm
- Breadboard prototyping board for experimental set-ups

Breadboard Prototyping Board 240 x 195 x 21mm

RS Stock No.: 102-9169

RS Professionally Approved Products bring to you professional quality parts across all product categories. Our product range has been tested by engineers and provides a comparable quality to the leading brands without paying a premium price.

Product Description

When you need to test out an idea or check how a circuit reacts under a given set of parameters, this breadboard from RS PRO can be used to build a prototype. Constructing a temporary circuit on the board is fast, easy and doesn't need soldering.

The prototyping board features 2,420 connection points and 24 switchable integrated circuit (IC) chips. The configuration offers a potential of 1,920 horizontal interconnections and 500 vertical interconnections. Switches can be implemented and changed quickly and simply. It includes an 8-way jumper link and four integrated terminal binding posts, which offer a connection option for 4 mm test leads.

General Specifications

| | |
|---------------------|---|
| Type | Prototyping Board |
| Tie Points | 2420 |
| Colour | White |
| Applications | Electronic labs, training and troubleshooting to testing out new components |

Mechanical Specifications

| | |
|-------------------|----------------------|
| Dimensions | 240mm x 195mm x 21mm |
| Length | 240mm |
| Width | 195mm |
| Height | 21mm |

Approvals

| | |
|----------------------------------|--|
| Compliance/Certifications | RoHS (Restriction of Hazardous Substances) compliant, ANSI/ESD S20.20:2014, BS EN 61340-5-1:2007 |
|----------------------------------|--|
