

## Datasheet RS Stock No: 281192

## Steel Black Self-Colour Hexagon Socket Button Head Screws: Metric Thread

Button Head Socket Screws are designed for light duty. They have a similar thread design as a Socket Cap Screw although the dome-shaped head is wider and has a lower profile than a Socket Cap Screw, presenting an aesthetic appearance to an assembly. These fasteners are ideal when a wider bearing surface is required.

Self-colour steel is an uncoated mild steel and is used in applications where corrosion resistance is not required. If painted or suitably treated these self-colour button head socket screws can be use din outdoor applications.

- Threaded in accordance with ISO 7380 standard
- 10.9 grade High Tensile Steel
- · Used for applications with limited space in high tensile applications
- Suitable for light fastening applications in most food, facilities maintenance and electronic & domestic applications.
- Typical applications include; Machine tooling, Securing guards and covers, Securing ornamental, fixtures, plus many more engineering applications
- Requires a Hex key / Allen key

Please view our full range listing below for all Steel Black Self-Colour Hexagon Socket Button Head Screws.

Head Shape	Material	Thread Size	Length	RS Part No.	
Hex Socket Cap	Steel	M3 8 mm		281186

Nominal Lengths above the stepped line Full Thread

Nominal Lengths below the stepped line, the thread length at the discretion of the manufacturer, may be between a minimum of 2d+12mm and a maximum which is within 2 P of the head.

~ISO 7380 ANSI B 18.3.4M

Neither standard is intended for high strength applications. The only purpose of having them produced in property class 10.9 or 12.9 is to increase the wear resistance of the socket drive.
