P3050CTD

Clean and pure
Drinking Water Filter
(10,000 US gallons / 38,000 Litres)

Made in USA

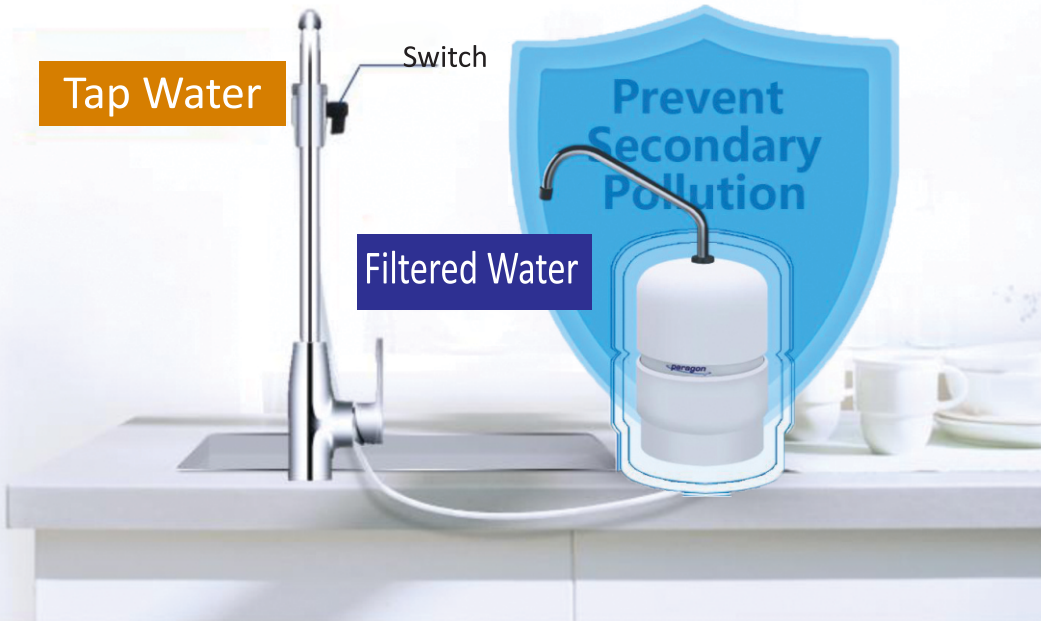

5 Stage Filtration

5 - stage filtration system can effectively reduce contaminants such as colloid, sediment and chlorine. It can also reduce heavy metals and organic pollutants in water.

Simple to Install

It is simple to install and connects easily to most standard kitchen tap faucets by twisting the switch, tap water and filtered water can be switched in no time.

Product Information Technical Details

Model P3050CTD

Working Temperature 4-38°C

Water Capacity 10,000 Gallons

Colour White

Inlet Water Municipal Water

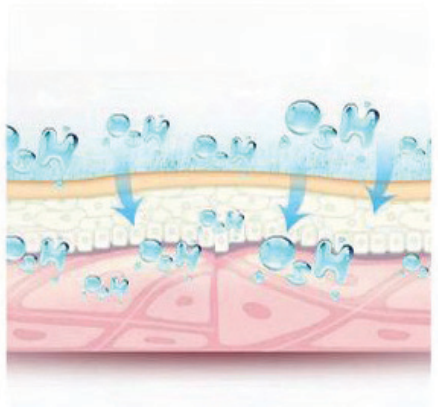

Flow Rate P7.4L/Min

Working Pressure 0.1-0.4 Mpa

Size ϕ @120x190mm

Micron Pad

Rough and deep filtration, remove the rust, silt, impurities.

Coconut Granular Activated Carbon

Coconut shell activated carbon has the characteristic of developed void structure, large surface area, strong wear resistance, fast adsorption speed, and large adsorption capacity.

KDF55

Copper-zinc alloy

Designated by the US Environmental protection Agency (USEPA) as a “microbial inhibition device”, “KDF copper - zinc alloy” can effectively transform harmful substances into harmless substances through REDOX reactions

MAINTENANCE FREE

P3050CTD

10,000G

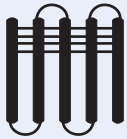

**10,000 Gallons
Water Capacity**

Made in USA

Electric - free

5 Stage Filtration

Zero waste water

Easy Installation

Simple to Install

It is simple to install and connects easily to most standard kitchen tap faucets by twisting the switch, tap water and filtered water can be switched in no time.
