

## FEATURES

- Heavy-duty screw clamp
- Jaw opening of 300mm
- Jaw depth of 120mm
- Forged steel clamping jaws
- Galvanised cold extruded rail
- Wide clamping surface
- Swivel clamping action
- High clamping capacity

# RS PRO 300mm x 120mm Screw Clamp

RS Stock No.: 771-9335

RS Professionally Approved Products bring to you professional quality parts across all product categories. Our product range has been tested by engineers and provides a comparable quality to the leading brands without paying a premium price.

### Product Description

This heavy-duty F-clamp has been designed for use in your construction projects. It's easy to use, so is ideal for both professionals and DIY enthusiasts.

The clamping jaws are made of high-quality forged steel. They can open to a maximum of 300 mm and have a depth of 120 mm. This delivers high clamping capacity. A galvanised cold extruding rail provides excellent strength and high fatigue resistance. This rail also has a serrated edge to give extra grip when locking the jaws in place. The clamp has a sliding pin handle for adjusting the jaws. Its wide clamping surface lets you hold large items securely in place.
