Steel Black Self-Colour Hexagon Socket Button Head Screws: Metric Thread

Button Head Socket Screws are designed for light duty. They have a similar thread design as a Socket Cap Screw although the dome-shaped head is wider and has a lower profile than a Socket Cap Screw, presenting an aesthetic appearance to an assembly. These fasteners are ideal when a wider bearing surface is required.

Self-colour steel is an uncoated mild steel and is used in applications where corrosion resistance is not required. If painted or suitably treated these self-colour button head socket screws can be used in outdoor applications.

- Threaded in accordance with ISO 7380 standard
- 10.9 grade High Tensile Steel
- Used for applications with limited space in high tensile applications
- Suitable for light fastening applications in most food, facilities maintenance and electronic & domestic applications.
- Typical applications include; Machine tooling, Securing guards and covers, Securing ornamental, fixtures, plus many more engineering applications
- Requires a Hex key / Allen key
